Going The Distance One Mans Journey To The End Of His Life:

Going the Distance George Sheehan, 1996-03-01 **The Boston Marathon** Tom Derderian, 2014-04-01 Offering an inside look at the most famous marathon in the world this exploration traces the Boston Marathon's 26.2 mile route from the starting line on narrow Main Street in Hopkinton to the Boylston Street finish line in downtown Boston bringing to life the history personalities pivotal moments and individual character of each city the race traverses The Boston Marathon includes well researched briefs on topics including Metcalf's Mill at Ashland the unmarked starting point of the first race in 1897 the infamous 1967 battle over Kathrine Switzer's attempt to compete five years before women were allowed and other vital race day elements The book also includes a tribute to the victims of the tragic 2013 bombing near the finish line This is a supremely entertaining glimpse at the history of the greatest running event in the world from wacky entrants to hard fisted managers tortured disappointments and glorious triumph *My Song: Memoir of an ER Physician* Craig Dean, MD, 2014-05-12 Thirty years in the making one hundred thousand patients later the hundred numinous patients I will forever treasure It has been said that memoirs are the narratives of our life and as such become the manner and method of how we make sense out of our life's journey Indeed I could not imagine my life without my career in the ER since without it I would truly feel like a naked wizened skeleton devoid of skin flesh or viscera The ER experience was the alchemist's stone that touched my ordinary life and in so many ways made it exquisitely gilded Many were the patients that stirred the invisible fabric of my soul and made the ordinary universe seem so much more expansive and unequalled The magnificence of the ER flows from the commanding variety of patients not unlike the arresting diversity of flora in the plant kingdom renders a regal awe upon the eyes and souls of the beholder **The Everything Running Book** Art Liberman, Randy Brown, Eileen Myers, 2011-12-18 Running can help you lose weight create a healthy body image and boost your self esteem No matter your fitness level you too can enjoy the benefits of this sport With this book you'll gain the knowledge and tools you need to run a 10K a marathon or just a lap around the block The new edition includes Cutting edge information on hugely influential trends in natural running including ChiRunning barefoot running and cross training with yoga and meditation Information on how to select the right gear and manage your nutrition including details on new diets favored by endurance athletes A dedicated section on running for women including specific nutritional and physical concerns Whether you're a beginner or a seasoned veteran this book has everything you need to maximize your running potential from start to finish Reconstructing Illness Anne Hunsaker Hawkins, 1999 Serious illness and mortality those most universal unavoidable and frightening of human experiences are the focus of this pioneering study which has been hailed as a telling and provocative commentary on our times As modern medicine has become more scientific and dispassionate a new literary genre has emerged pathography the personal narrative concerning illness treatment and sometimes death Hawkins's sensitive reading of numerous pathographies highlights the assumptions attitudes and myths that people bring to the medical encounter One factor

emerges again and again in these case studies the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease Pathography allows the individual person a voice one that asserts the importance of the experiential side of illness and thus restores the feeling thinking experiencing human being to the center of the medical enterprise Recommended for medical practitioners the clergy caregivers students of popular culture and the general reader *Reconstructing Illness* demonstrates that only when we hear both the doctor's and the patient's voice will we have a medicine that is truly human *The Big Scare* Anthony Horan, 2009 **Running & Being** George Sheehan, 2014-04-01 A New York Times bestseller for 14 weeks in 1978 *Running Being* became known as the philosophical bible for runners around the world More than thirty years after its initial publication it remains every bit as relevant today Written by the late beloved Dr George Sheehan *Running Being* tells of the author's midlife return to the world of exercise play and competition in which he found a world beyond sweat that proved to be a source of great revelation and personal growth But *Running Being* focuses more on life than it does specifically on running It provides an outline for a lifetime program of fitness and joy showing how the body helps determine our mental and spiritual energies Drawing from the words and actions of the great athletes and thinkers throughout history Sheehan ties it all together with his own philosophy on the importance of fitness and sport as well as his knowledge of training injury prevention and race competition Above all Sheehan describes what it means to experience the oneness of body and mind of self and the universe In this Sheehan argues we have the power to discover the truth that makes men free **Body Problems** Ben Agger, 2012-08-06 This book addresses the relationship between the body and society in a fast food society Agger focuses on issues of food exercise work dieting and eating disorders fashion bariatric and cosmetic surgery and health He addresses the dilemma that we have ample access to abundant calories but lead lifestyles and have jobs that for the most part do not enable us to expend those calories He proposes solutions both individual and structural that involve re-orienting ourselves to exercise as play The book can be used in introductory sociology social problems work sociology of sport gender health and illness The goal of this new unique Series is to offer readable teachable thinking frames on today's social problems and social issues by leading scholars all in short 60 page or shorter formats and available for view on <http://routledge.customgateway.com/routledge-social-issues.html> For instructors teaching a wide range of courses in the social sciences the Routledge Social Issues Collection now offers the best of both worlds originally written short texts that provide overviews to important social issues as well as teachable excerpts from larger works previously published by Routledge and other presses *Running, Thinking, Writing* Jackie Hoermann-Elliott, 2021-06-12 For the creative fulfillment of writers who identify as runners walkers or movers *Running Thinking Writing Embodied Cognition in Composition* unveils the varied understandings of the relationship between writing activity and physical activity Jackie Hoermann Elliott provides an interdisciplinary overview of relevant research from the fields of composition studies cognitive science neuroscience and sports psychology before proposing a new theoretical

Next Medicine Walter Bortz, MD, 2011-01-03 In *Next Medicine* Walter Bortz shows how the defects of American healthcare threaten the stability of our entire nation A physician with fifty years of experience and an expert on aging Bortz argues that the financial interests of biotech and drug companies have eroded the values of the medical profession and placed profit before human wellbeing Heart disease for example is widely treated with drug interventions and invasive surgery both of which are extravagantly profitable But daily exercise and a healthy diet can prevent heart disease altogether for free

Strides Benjamin Cheever, 2007-09-18 Acclaimed novelist Benjamin Cheever author of *The Plagiari* Famous After Death and *The Good Nanny* brings his buoyant literary style to this impassioned memoir about the sport that changed his life From Pheidippides who ran the first marathon in 490 BC bringing news to Athens of the Greek victory on the plains of Marathon to our own soldiers in Iraq today running is an integral part of human

culture and legend In Strides heralded author Benjamin Cheever explores the role of running in human history while interspersing this account with revelations of his own decades long devotion to the sport Cheever has traveled the world writing features for Runner s World magazine and he draws from this rich experience on every page His adventures have taken him to Kenya in search of the secrets of the world s fastest long distance runners and to a 10 K race with American soldiers in Baghdad Cheever celebrates the quotidian personal satisfaction of a morning run and the more exotic pleasures of the Medoc Marathon in Bordeaux where fine wines are served at water stations and the first prize is the winner s weight in grand crus He shares vivid moments from the New York Marathon and waxes rhapsodic about the granddaddy of American distance events the Boston Marathon But what truly distinguishes Strides as a memorable read is the unique lens through which this sparkling writer explores our deep bond to running an experience he likens to that of being able to fly
