How Public Schools Destroy Your Children's Lives and Careers Sandro Sehic, 2010-06. Educating your children in the public schools does not take one minute or perhaps one day. Education is a life long process and whether we like it or not, the fact is it never stops. Your children will spend the most important part of their lives at the public schools and whatever they learn at those schools will impact their lives as long as they live. What really happens to your children at public schools each day? Do you think that your children are learning useful information in today's schools? If you think that your children will leave today's public schools properly prepared for real life, the answer is no, you are WRONG. Public schools have failed. Many teachers are not properly educated with the appropriate teaching certification. School administrators constantly sell lies about the success of their students when in reality they are failing miserably. Today's courses and exams are designed to be very simple so that they no longer test the knowledge of our children properly. The greatest portion of school budgets is spent on the salary of local school administrators. Almost everything your children learn in today's public schools is useless. Teaching positions are no longer designed for the smartest and most qualified teachers; they have become political positions that anyone can hold as long as they get approved by the school board. It's not too late to do something to turn this around. **How Public Schools Destroy Your Children's Lives and Careers** offers thoughts and solutions on this hot button topic.

Raising Twice-Exceptional Children Emily Kircher-Morris, 2022-01-31. Just because a child is gifted doesn't mean they don't have other types of neurodivergence like ADHD, autism, dyslexia, and more. Conversely, even children with one of these diagnoses can be cognitively gifted. **Raising Twice-Exceptional Children** provides you with a road map to understand the complex make up of your gifted plus or twice exceptional child or teen. The book helps you understand your child's diagnosis, meet their social/emotional needs, build self-regulation skills, and goal setting, and teach self-advocacy. It also shows you effective ways to collaborate with teachers and school staff and it offers advice on finding strengths-based strategies that support development at home. For too long, these kids have fallen through the cracks. This

book provides key information on how to best support neurodivergent children by leveraging their strengths while supporting their struggles
