Design for the Crowd Joanna Merwood-Salisbury, 2019-10-03 Situated on Broadway between Fourteenth and Seventeenth Streets Union Square occupies a central place in both the geography and the history of New York City Though this compact space was originally designed in 1830 to beautify a residential neighborhood and boost property values by the early days of the Civil War New Yorkers had transformed Union Square into a gathering place for political debate and protest As public use of the square changed so too did its design When Frederick Law Olmsted and Calvert Vaux redesigned the park in the late nineteenth century they sought to enhance its potential as a space for the orderly expression of public sentiment A few decades later anarchists and Communist activists including Emma Goldman turned Union Square into a regular gathering place where they would advocate for radical change In response a series of city administrations and business groups sought to quash this unruly form of dissidence by remaking the square into a new kind of patriotic space As Joanna Merwood Salisbury shows us in *Design for the Crowd* the history of Union Square illustrates ongoing debates over the proper organization of urban space and competing images of the public that uses it In this sweeping history of an iconic urban square Merwood Salisbury gives us a review of American political activism philosophies of urban design and the many ways in which a seemingly stable landmark can change through public engagement and design Published with the support of Furthermore a program of the J M Kaplan Fund

Religion and Art in the Heart of Modern Manhattan Aaron Rosen, 2017-07-28 When you re in New York the sculptor Louise Nevelson once said you re in perpetual resurrection She might have said the same thing about St Peter s Lutheran Church set in the heart of midtown Manhattan In the 1970s the church made a radical move scrapping its neo gothic building for a sleek modern structure in the shadow of a skyscraper The transformation was not just architectural Inside Nevelson created a shimmering chapel while over the years artists and designers such as Willem de Kooning Kiki Smith and Massimo and Lella Vignelli produced works for the sanctuary This fusion of modern art architecture and design was complemented by an innovative jazz ministry including funerals for Billy Strayhorn and John Coltrane and performances by Duke Ellington and other jazz legends For the first time this volume examines the astounding cultural output of this single church Just as importantly the story of St Peter s serves as a springboard for wider reflections on the challenges and possibilities which arise when religion and art intersect in the modern city Working from a wide range of disciplines including art history theology musicology and cultural studies a distinguished group of scholars demonstrate that this church at the center of New York City deserves an equally central place in contemporary scholarship

Chicago Skyscrapers, 1934-1986 Thomas Leslie, 2023-06-20 From skyline defining icons to wonders of the world the second period of the Chicago skyscraper transformed the way Chicagoans lived and worked Thomas Leslie s comprehensive look at the modern skyscraper era views the skyscraper idea and the buildings themselves within the broad expanse of city history As construction emerged from the Great Depression structural mechanical and cladding innovations evolved while continuing to influence designs But the truly radical changes concerned the motivations that drove construction While profit remained key in the Loop developers elsewhere in Chicago worked with a Daley political

regime that saw tall buildings as tools for a wholesale recasting of the city's appearance, demography and economy. Focusing on both the wider cityscape and specific buildings, Leslie reveals skyscrapers to be the physical results of negotiations between motivating and mechanical causes. Illustrated with more than 140 photographs, *Chicago Skyscrapers 1934-1986* tells the fascinating stories of the people, ideas, negotiations, decision making, compromises and strategies that changed the history of architecture and one of its showcase cities.
