

A romantic couple is shown in a close embrace, lying in bed. The man, with dark hair and a beard, is wearing a white shirt and has his eyes closed, leaning his head against the woman's. The woman, with long dark hair, is also wearing a white shirt and has her eyes closed, resting her head on the man's chest. They are both smiling softly. The background is a bright, airy room with a window showing a view of a city and a small potted plant on a shelf.

Counseling Techniques Rosemary Thompson, 2003. First Published in 2003. Routledge is an imprint of Taylor Francis, an information company.

Shrinking Violets and Caspar Milquetoasts Patricia McDaniel, 2003-11. Since World War II, Americans' attitudes towards shyness have changed. The women's movement and the sexual revolution raised questions about communication, self expression, intimacy and personality, leading to new concerns about shyness. At the same time, the growth of psychotherapy and the mental health industry brought shyness to the attention of professionals who began to regard it as an illness in need of a cure. But what is shyness? How is it related to gender, race and class identities? And what does its stigmatization say about our culture? In *Shrinking Violets and Caspar Milquetoasts*, Patricia McDaniel tells the story of shyness. Using popular self help books and magazine articles, she shows how prevailing attitudes toward shyness frequently work to disempower women. She draws on evidence as diverse as 1950s views of shyness as a womanly virtue to contemporary views of shyness as a barrier to intimacy to highlight how cultural standards governing shyness reproduce and maintain power differences between and among women and men.

Sexual and Reproductive Neurorehabilitation Mindy L. Aisen, 2013-03-09. This well written text thoroughly addresses two quality of life issues in patients with a variety of neurological disorders: sexual and reproductive function. The devastating effects of a variety of neurological diseases are well known to both the lay and medical communities and are treated in numerous texts. However, as we continue to experience therapeutic breakthroughs in the fields of neurology and rehabilitation medicine, physicians and patients must become more aware of the issues discussed in this text. It is particularly important, as emphasized throughout the chapters, that the physician or therapist initiate conversations with the patients concerning both the possibility of parenting a child as well as the ability of the patient to enhance his/her sexual functioning. Commonly, in the patient who is otherwise perfectly normal, there is a reluctance to discuss these topics and couples often feel embarrassed to initiate a conversation with their physicians. This reluctance to initiate a discussion is even more apparent in patients with a variety of neurological disorders in which there are overriding fears concerning both function and survival as well as deep concerns about their own attractiveness and their sexual and reproductive ability.
