This book explores opportunities and challenges in the field of Internet of Everything (IoE) security and privacy under the umbrella of distributed ledger technologies and blockchain technology, including distributed consensus mechanisms, crypto sensors, encryption algorithms, and fault tolerance mechanisms for devices and systems. It focusses on the applicability of blockchain technology, including architectures and platforms for blockchain and IoE authentication and encryption algorithms for IoE malicious transactions detection, blockchain for forensics, and so forth. Outlines the major benefits as well as challenges associated with integration of blockchain with IoE. Describes detailed framework to provide security in IoE using blockchain technology. Reviews various issues while using distributed ledger technologies for IoE. Provides comprehensive coverage of blockchain for IoE in securing information, including encryption schemes, authentication, security issues, and challenges. Includes case studies in realistic situations like healthcare informatics, smart industry, and smart transportation. This book is aimed at researchers and graduate students in computing, cryptography, IoT, computer engineering, and networks.

Intelligent Cyber-Physical Systems for Autonomous Transportation Sahil Garg, Gagangeet Singh Aujla, Kuljeet Kaur, Syed Hassan Ahmed Shah, 2022-04-27. This book provides comprehensive discussion on key topics related to the usage and deployment of AI in urban transportation systems, including drones. The book presents intelligent solutions to overcome the challenges of static approaches in the transportation sector to make them intelligent, adaptive, agile, and flexible. The book showcases different AI deployment models, algorithms, and implementations related to intelligent cyber physical systems (CPS).

along with their pros and cons Even more this book provides deep insights into the CPS specifically about the layered architecture and different planes interfaces and programmable network operations The deployment models for AI based CPS are also included with an aim towards the design of interoperable and intelligent CPS architectures by researchers in future The authors present hands on practical implementations deployment scenarios and use cases related to different transportation scenarios In the end the design and research challenges open issues and future research directions are provided

Self-Organization and Green Applications in Cognitive Radio Networks Al-Dulaimi, Anwer, Cosmas, John, Mohammed, Abbas, 2013-01-31 Self Organization and Green Applications in Cognitive Radio Networks provides recent research on the developments of efficient cognitive network topology The most current procedures and results are presented to demonstrate how developments in this area can reduce complications confusion and even costs The book also identifies future challenges that are predicted to arrive in the Cognitive Radio Network along with potential solutions This innovative publication is unique because it suggests green energy efficient and cost efficient resolutions to the inevitable challenges in the network
