Mountains Figured and Disfigured in the English-Speaking World Françoise Besson, 2020-06-01 The essays in this book written by poets novelists mountain climbers and academics from all over the world evoke the representation of mountains in the English speaking world as artists writers philosophers or mountain climbers have represented them from the sixteenth to the twenty first centuries From the Alps to the Pyrenees from Mount Fuji to Mount Shasta from the Himalayas to the Scottish Highlands from Ikere in Nigeria to Devil's Tower in the United States from Uluru in Australia to

the most northern mountain of the Arctic the shapes of the world speak the same language and tell the world its own story This interdisciplinary book weaving together mountaineering literature philosophy painting cinema ecology history palaeontology geography geopolitics toponymy law religion and myth invites people to an innovative reading of mountains it reveals the close relationship existing between the shapes of the world and all forms of writing and at the same time it shows how the representations of the imagination may be instrumental in protecting the natural world The story told by the landscape inscribes a broken line in the shapes of the world tearing the landscape like a fragile page whenever historical and political events wars mining or deforestation leave scars in the landscape but writers and artists representations of mountains constitute a path to awareness as they are not only a painting of beauty but an image of our link to nature and a warning as well For centuries the image of the mountain has conveyed a symbolism telling the story of human thought and this book shows to what extent literature and art play an essential part in our awareness of nature

The Last Lynching Anthony S. Pitch, 2016-03-22 Nothing casts a more sinister shadow over our nation's history than the gruesome lynchings that happened between 1882 and 1937 claiming 4 680 victims Often in a show of racist violence the lynchers tortured their victims before murdering them Most killers were never brought to justice some were instead celebrated as heroes their victims bodies displayed or even cut up and distributed as trophies Then in 1946 the dead bodies of two men and two women were found near Moore's Ford Bridge in rural Monroe Georgia Their killers were never identified And although the crime reverberated through the troubled community the corrupt courts and eventually the whole world many details remained unexplored until now In *The Last Lynching* Anthony S Pitch reveals the true story behind the last mass lynching in America in unprecedented detail Drawing on some 10 000 previously classified documents from the FBI and National Archives *Lynched* paints an unflinching picture of the lives of the victims suspects and eyewitnesses and describes the political judicial and socioeconomic conditions that stood in the way of justice Along the way *The Last Lynching* sheds light into a dark corner of American history which no one can afford to ignore Skyhorse Publishing as well as our Arcade
