The Death of Hamlet Amir Khan, 2025-01-06 This book is an intervention in Hamlet scholarship. In Thus Spake Zarathustra 1885 Nietzsche famously posited the death of God taken to mean the dissolution of all horizons within which human beings construct a plausible ontology that gives words significance. The idea of God as a transcendental signified to borrow from Derrida underwrites meaning and values. Socrates placed knowing as the highest philosophical good over two millennia ago however once we find that God is any transcendental signified is unknowable the world vanishes. In a world bereft of concepts and meaning Nietzsche's philosophical project becomes one of redeeming pure willing as itself constitutive of world. Hamlet and the criticism surrounding it is caught within competing horizons we know are circuitous and unending. We tiresomely make theoretical rounds between competing sets of interpretations that boil down to either establishing meaning within the play the text transcending its history and revealing universal truths or situating the text within its proper historical timeframe in order to get it to speak. In short we are trapped between contextualizing and decontextualizing approaches. Yet we know both approaches as competing horizons we commit to at the outset are dead. But to abandon both at the outset means that the text Hamlet is itself dead. So how to get it to speak.
