Handbook Of War Studies II V :

Handbook of War Studies II Manus I. Midlarsky, 2000 Essays reflecting the most recent theoretically and empirically oriented research on international warfare The Scourge of War Paul Diehl, 2010-03-25 J David Singer's legendary Correlates of War project represented the first comprehensive effort by political scientists to gather and analyze empirical data about the causes of war In doing so Singer and his colleagues transformed the face of twentieth century political science Their work provoked some of the most important debates in modern international relations about the rules governing territory international intervention and the so called democratic peace Editor Paul F Diehl has now convened some of the world's foremost international conflict analysis specialists to reassess COW's contribution to our understanding of global conflict Each chapter takes one of COW's pathbreaking ideas and reevaluates it in light of subsequent world events and developments in the field The result is a critical retrospective that will reintroduce Singer's important and still provocative findings to a new generation of students and specialists Paul F Diehl is Professor of Political Science and University Distinguished Scholar at the University of Illinois Urbana Champaign **How War Began** Keith F. Otterbein, 2004 Have humans always fought and killed each other or did they peacefully coexist until organized states developed Is war an expression of human nature or an artifact of civilization Questions about the origins and inherent motivations of warfare have long engaged philosophers ethicists and anthropologists as they speculate on the nature of human existence In *How War Began* author Keith F Otterbein draws on primate behavior research archaeological research and data gathered from the Human Relations Area Files to argue for two separate origins He identifies two types of military organization one that developed two million years ago at the dawn of humankind wherever groups of hunters met and a second that developed some five thousand years ago in four identifiable regions when the first states arose and proceeded to embark upon military conquests In careful detail Otterbein marshals evidence for his case that warfare was possible and likely among early Homo sapiens He argues from comparison with other primates from Paleolithic rock art depicting wounded humans and from rare skeletal remains embedded with weapon points to conclude that warfare existed and reached a peak in big game hunting societies As the big game disappeared so did warfare only to reemerge once agricultural societies achieved a degree of political complexity that allowed the development of professional military organizations Otterbein concludes his survey with an analysis of how despotism in both ancient and modern states spawns warfare A definitive resource for anthropologists social scientists and historians *How War Began* is written for all who are interested in warfare whether they be military buffs or those seeking to understand the past and the present of humankind Publisher *Acting Alone* Bradley F. Podliska, 2010-03-16 *Acting Alone* A Scientific Study of American Hegemony and Unilateral Use of Force Decision Making is a straight forward analysis of unilateral U S military actions which are dependent upon the power disparity between the U S and the rest of the world In solving the puzzle as to why individual presidents have made the wrong decision to act alone the

author lays out a president's behavior during a crisis as a two step decision process Acting Alone reviews the well studied first decision deciding to use force based on international conflict literature and organized along traditional lines The author then details the second decision deciding to use unilateral force with an explanation of the criticisms of multilateralism and the reasons for unilateralism To test a new theory of unilateral use of force decision making Acting Alone devises a definition and coding rules for unilateral use of force develops a sequential model of presidential use of force decision making and constructs a new alternative measure of military power a Composite Indicator of Military Revolutions CIMR It then uses three methods a statistical test with a heckman probit model an experiment and case studies to test U S crisis behavior since 1937 By applying these three methods the author finds that presidents are realists and make expected utility calculations to act unilaterally or multilaterally after their decision to use force The unilateral decision in particular positively correlates with a wide military gap with an opponent an opponent located in the Western hemisphere and a national security threat

The Post-Cold War International System Ewan Harrison, 2004-07-31 The end of the Cold War has opened up a real world laboratory in which to test and refine general theories of international relations Using the frameworks provided by structural realism institutionalism and liberalism The Post Cold War International System examines how major powers responded to the collapse of the Soviet Union and developed their foreign policies over the period of post Cold War transition The book argues that the democratic peace has begun to generate powerful socialisation effects due to the emergence of a critical mass of liberal democratic states since the end of the Cold War The trend this has produced is similar to a pattern that classical realists have interpreted as bandwagoning within a unipolar power structure Case studies of Germany China and Japan identified as key states with the potential to challenge US dominance provide evidence to support the assessment of international change The author concludes by exploring the implications of September 11th for the analysis developed This important volume argues that the end of the Cold War was a major historical turning point in the development of world politics with fundamental implications for the basic way in which the dynamics of the international system are conceptualised

The Waning of Major War Raimo Vayrynen, 2013-10-31 This book is a systematic effort by leading international scholars to map the trends in major power warfare and explore whether it is waxing or waning The main point of departure is that major power war as a historical institution is in decline This does not mean though that wars between states are in general disappearing While there is some convergence in the conclusions by individual authors they are by no means unanimous about the trend The articles explore different causes and correlates of the declining trend in major power warfare including the impact of the international structure nuclear weapons international law multilateral institutions sovereignty and value changes

The Liberal Peace and Post-War Reconstruction Roger MacGinty, Oliver Richmond, 2013-09-13 The post Cold War has witnessed enormous levels of western peacekeeping peacemaking and reconstruction intervention in societies emerging from war These western led interventions are often called liberal peacebuilding or liberal interventionism

or statebuilding and have attracted considerable controversy In this study leading proponents and critics of the liberal peace and contemporary post war reconstruction assess the role of the United States European Union and other actors in the promotion of the liberal peace and of peace more generally Key issues including transitional justice and the acceptance rejection of the liberal peace in African states are also considered The failings of the liberal peace most notably in Iraq and Afghanistan but also in other locations have prompted a growing body of critical literature on the motivations mechanics and consequences of the liberal peace This volume brings together key protagonists from both sides of the debate to produce a cutting edge state of the art discussion of one the main trends in contemporary international relations This book was originally published as a special issue of Global Society

Causes of War Jack S. Levy, William R. Thompson, 2011-09-15 Written by leading scholars in the field Causes of War provides the first comprehensive analysis of the leading theories relating to the origins of both interstate and civil wars Utilizes historical examples to illustrate individual theories throughout Includes an analysis of theories of civil wars as well as interstate wars one of the only texts to do both Written by two former International Studies Association Presidents

Against Islamophobia Arno Tausch, 2007 In this book the author presents optimistic socio liberal conclusions about Islam in the world system Countering some alarmist voices in the West neither migration nor Muslim culture are to be blamed for the contemporary crisis but the very nature of unequal capitalist accumulation and dependency that is at the core of the world capitalist system For one the analysis is based on current thinking on Kondratiev waves of world political development inherent in recent work by IISA and the NATO Institute for Advanced Studies Analyses are also presented on the framework of the debate on cross national determinants of human well being in the world system While the author is cautiously optimistic about a socio liberal non interventionist policy alternative he has come to the conclusion that present patterns of global governance modeled around the neo liberal Washington Consensus and American hyperpower are doomed for failure A new socio liberal global consensus on global migration global order and global governance could emerge instead

Security Studies Associate Professor Elliott School of International Affairs Paul D Williams, Dr, Paul D. Williams, 2008-06-03 Security Studies is the most comprehensive textbook available on security studies It gives students a detailed overview of the major theoretical approaches key themes and most significant issues within security studies Part 1 explores the main theoretical approaches currently used within the field from realism to international political sociology Part 2 explains the central concepts underpinning contemporary debates from the security dilemma to terrorism Part 3 presents an overview of the institutional security architecture currently influencing world politics using international regional and global levels of analysis Part 4 examines some of the key contemporary challenges to global security from the arms trade to energy security Part 5 discusses the future of security Security Studies provides a valuable teaching tool for undergraduates and MA students by collecting these related strands of the field together into a single coherent textbook

Scare Tactics Michael P. Colaresi, 2005-12-29 Why do international situations spiral out of

control and into war Why do conflicts finally wind down after years if not decades of tension Various faults in conventional thinking ranging from relying on indeterminate predictions to ignoring the interaction between domestic and international events have impeded adequate explanations for the continuation escalation and dampening of rivalry conflict In *Scare Tactics The Politics of International Rivalry* Michael P Colaresi explains how domestic institutions and interactions among nations converge to create incentives for either war or peace Specifically domestic pressure to continue a rivalry and resist capitulating to the enemy can be exacerbated in situations where elites benefit from fear mongering a process Colaresi refers to as rivalry outbidding When rivalry outbidding becomes fused with pressure to change the status quo even a risky escalation may be preferable to cooperation or rivalry maintenance The eventual outcomes of such dynamic two level pressures if unchecked are increased conflict destruction and death Colaresi contends however that if leaders can resist pressures to escalate threats and step up rivalries a deteriorating status quo can instead spur cooperation and peace **The**

Realism Reader Colin Elman, Michael Jensen, 2014-08-12 The *Realism Reader* provides broad coverage of a centrally important tradition in the study of foreign policy and international politics After some years in the doldrums political realism is again in contention as a leading tradition in the international relations sub field Divided into three main sections the book covers seven different and distinctive approaches within the realist tradition classical realism balance of power theory neorealism defensive structural realism offensive structural realism rise and fall realism and neoclassical realism The middle section of the volume covers realism's engagement with critiques levelled by liberalism institutionalism and constructivism and the English School The final section of the book provides materials on realism's engagement with some contemporary issues in international politics with collections on United States U S hegemony European cooperation and whether future threats will arise from non state actors or the rise of competing great powers The book offers a logically coherent and manageable framework for organizing the realist canon and provides exemplary literature in each of the traditions and dialogues which are included in the volume Offering substantial commentary and analysis and including enhanced pedagogy to facilitate student learning The *Realism Reader* will provide a one stop shop for undergraduates and masters students taking a course in contemporary international relations theory with a particular focus on realism Quantifying

International Conflicts Louise Beaumais, Iris Lambert, Thomas Lindemann, Sami Makki, Frédéric Ramel, Eric Sangar, 2025-08-24 Based on the Datawar research program developed by three French academic institutions this book seeks to explore the following research question how do social practices of data collection and analysis in quantitative conflict studies influence researchers and practitioners representations of armed conflict The editors and authors investigate both scientific practices in the field of quantitative conflict studies and the impact of these practices on practitioners vision of war covering the full lifecycle of quantitative conflict data from collection and analysis to their use and dissemination by military and diplomatic institutions humanitarian organizations and the media **Mediating International Crises** Jonathan

Wilkenfeld, Kathleen Young, David Quinn, Victor Asal, 2007-05-07 This new book shows how international crises are dangerous episodes that can be destabilizing not only to the actors directly involved but also to the entire international system Recognizing the primacy of crises as defining moments in international relations scholars and policy makers alike are increasingly concerned with identifying mechanisms for crisis prevention management and resolution Mediating International Crises is the first comprehensive study into one such mechanism that has been used with increasing frequency in the 20th Century mediation by a third party This important research attempts to determine whether third party mediation is an effective means of alleviating or managing the turbulent and violent consequences of crises The authors examine three approaches to mediation facilitation communication between parties formulating possible agreements and manipulating the parties through sanctions or rewards They explore how these mediation approaches affect crisis outcomes through sanctions or rewards The book begins with a thorough discussion of the theoretical literature on mediation with particular attention paid to the important distinction between crisis management and conflict resolution The authors then provide empirical analyses of instances of mediation in 20th century international crises which is supplemented with data derived from simulated negotiation settings with human subjects

When Right Makes Might Stacie E. Goddard, 2018-12-15 No detailed description available for When Right Makes Might

War and Virtual War, 2021-10-25 If the practice of war is as old as human history so too is the need to reflect upon war to understand its meaning and implications The Pre Socratic philosopher Heraclitus asserted in 600BC that War polemos is justice thus inaugurating a long philosophical tradition of consideration of the morality of war In recent times the increased specialisation of academic disciplines has led a to a fragmentation of the thematic of war within the academy the topic of war is as likely to be addressed by sociologists cultural theorists psychologists and even computer scientists as it is by historians philosophers or political scientists This diversity of disciplinary approaches to war is undoubtedly fruitful in itself but can lead to an isolation of respective disciplinary analyses of war from each other In July 2002 at Mansfield College Oxford an inter disciplinary conference on war entitled War and Virtual War was held so as to redress some of this disciplinary isolationism and to forge an integrative dialogue on war in all its facets The papers in this volume were nominated by delegates as the most paradigmatic of the ethos of the original project and the most successful in achieving its aims of inter disciplinaryity and critical dialogue

Understanding Conflict and Violence Tim Jacoby, 2007-09-12 This book examines and interprets a wide range of approaches to the causes of violence and conflict The causes of violence and conflict are often left untheorized or they are discussed as an existent problem assumed to be an inevitable part of human interaction Adopting an accessible approach this volume presents readers with a clear understanding of the causes of violence and conflict by highlighting their evolutionary roots and illustrating them with in depth case studies and examples Tim Jacoby addresses the fragmented nature of the literature on conflict theory by drawing upon a wide range of disciplinary traditions seeking to reflect the fact that international relations

history economics development politics and sociology all share a long standing interest in the study of conflict and violence and that common concerns make interdisciplinary stimulating and productive Understanding Conflict Violence will be of interest to students and scholars across the disciplines of international relations history economics development politics and sociology

The Killing Trap Manus I. Midlarsky, 2005-10-20 The Killing Trap offers a comparative analysis of the genocides politicides and ethnic cleansings of the twentieth century which are estimated to have cost upwards of forty million lives The book seeks to understand both the occurrence and magnitude of genocide based on the conviction that such comparative analysis may contribute towards prevention of genocide in the future Manus Midlarsky compares socio economic circumstances and international contexts and includes in his analysis the Jews of Europe Armenians in the Ottoman Empire Tutsi in Rwanda black Africans in Darfur Cambodians Bosnians and the victims of conflict in Ireland The occurrence of genocide is explained by means of a framework that gives equal emphasis to the non occurrence of genocide a critical element not found in other comparisons and victims are given a prominence equal to that of perpetrators in understanding the magnitude of genocide

Grasping the Nettle Chester A. Crocker, 2005 Among the unwelcome legacies of the past century are a group of conflicts both intrastate and interstate that seem destined never to end From Kashmir to Nagorno Karabakh Colombia to Sudan the Korean Peninsula to the Middle East these deeply entrenched intermittently violent conflicts have so far resisted all outside efforts to resolve them What lessons aside from the apparent futility of mediation can such dismal situations possibly offer As the distinguished contributors to Grasping the Nettle make plain this is not a rhetorical question Unyielding conflicts offer numerous insights not only about the sources of intractability but also about such facets of mediation and conflict management as how to gain leverage when to engage and disengage how to balance competing goals and who to enlist to play supporting roles The first part of this eye opening volume identifies and analyzes the defining characteristics and underlying dynamics of intractable conflicts The second part turns the spotlight on no fewer than eight current cases in each instance chronicling the conflict s evolution evaluating the internal and external factors that have conspired to prevent a settlement and assessing whether past peacemaking initiatives have in fact only aggravated the conflict The conclusion makes the point that even intractable conflicts eventually end and highlights the strategic approaches and tactical steps that have yielded success in the past for mediators and conflict managers from governments international organizations and NGOs

Theory and Evidence in Comparative Politics and International Relations R. Lebow, M. Lichbach, 2007-08-20 This book explores the epistemology and the methodology of political knowledge and social inquiry what can we know and how do we know Contributing authors offer answers addressing the purpose and methods of research and analyzing concepts including the relationship of theory and evidence and the importance of evidence to social science
