Social Work, Mental Health, and Public Policy in Diverse Contexts Sheying Chen,2023-08-29 The discipline of social policy oftentimes deemed a part of social work as a profession was born in the West Unlike social policy that started with the post war idea of a welfare state in the mid 20th century social work traces its roots to individual casework pioneered by the Charity Organization Society COS early social administration including state wide poverty relief an advocacy effort of the COS but with deep roots in the English Poor Laws of the 17th century and social action emphasizing political activities to improve social conditions originating from the Settlement House Movement which began in the 1880s The development of social work is historically intertwined with that of public welfare philanthropy and charity and is an inherently international subject This conception is broader than international social work as a discrete field of professional practice which crosses geopolitical borders and all levels of social and economic organizations with a focus on development However each nation has a story of its own in terms of professionalization of social work in the evolution of public welfare and philanthropic charitable undertaking within its particular economic political social and cultural settings A wide ranging and in depth study of various especially non Western country cases is essential to an adequate comprehensive understanding of the social work profession which is also a basic requirement of its value of diversity China is undoubtedly an important case with the largest population on earth It s also unique in view of so called Chinese characteristics which are sometimes fundamentally different from other particularly Western societies It s even intriguing given the country s lengthy complex history and its recent rapid rise to a global superpower with a claim of national goals and core values that seem to be rather considerable to social work as a helping profession Therefore any significant lessons learned from the Chinese experiences would help with a better international understanding and further advancement of social work and public welfare at a global scale

Human Behavior for Social Work Practice
Wendy L. Haight, Edward H. Taylor, Ruth Soffer-Elnekave, 2020
The primary goal of this text is to support social work students in HBSE 1 courses to develop a conceptual framework for understanding and meeting the challenges they will likely encounter in 21st century practice. Through contemporary scholarship in human development, ecology and systems theory, we build on social work's classic bio-psycho-social-spiritual framework. Our interdisciplinary developmental ecological systems framework addresses the ways in which human beings shape and are shaped within complex and dynamic national and international contexts across the lifespan. We attempt to establish a bridge between undergraduate courses in the social behavioral and biological sciences and social work practice courses. We begin by establishing a framework for understanding human behavior in the social environment through chapters providing an historical overview of the interdisciplinary roots of the developmental ecological systems framework, the brain and development and the role of empirical evidence on social work practice. Then we examine social work issues at various points in human development using specific programs and policies to illustrate developmentally and culturally sensitive social work practice. These chapters include excerpts from interviews with practicing social workers. Part 3 focuses on social work issues affecting individuals across the lifespan and around the globe through chapters on disability and stigmatization, race, racism and resistance, women and gender and terrorism.
