**Handbook of Interpersonal Commitment and Relationship Stability** Jeffrey M. Adams, Warren H. Jones, 2012-12-06

A fundamental assumption underlying the formation of our most important relationships is that they will persist indefinitely into the future. As an acquaintanceship turns into a friendship, for example, both members of this newly formed interpersonal bond are likely to expect that their interactions will become increasingly frequent, diverse, and intimate over time. This expectation is perhaps most apparent in romantically involved couples who, through a variety of verbal and symbolic means, make explicit pledges to a long-lasting relationship. In either case, it is clear that these relationships represent something valuable to the individuals involved and are pursued with great enthusiasm. Virtually all close relationships are formed within the context of mutually rewarding interactions and/or strong physical attraction between partners. Friends and romantically involved couples alike are drawn to one another because of similarity of attitudes, interests, and personality, and quite simply because they enjoy one another's company. This enjoyment, coupled with the novelty that characterizes new relationships, almost makes the continuation of the relationship a foregone conclusion. As relationships progress, however, their novelty fades; conflicts may arise between partners; negative life events may occur; and the satisfaction that previously characterized the relationships may diminish.

**Understanding Non-Monogamies** Meg Barker, Darren Langdridge, 2010-02-02 Most social scientific work on intimate relationships has assumed a monogamous structure or has considered anything other than monogamy only in the context of infidelity. Yet in recent years, there has been a growing interest among researchers and the public in exploring various patterns of intimacy that involve open non-monogamy. This volume gathers contributions from academics, activists, and practitioners throughout the world to explore non-monogamous relationships. Featuring both empirical and theoretical pieces, contributors examine the history and cultural basis of various forms of non-monogamy; experiences of non-monogamous living; psychological understandings of relationship patterns; language and emotion; the discursive construction of mononormativity; as well as issues of race, class, disability, sexuality, and gender. This volume will be of interest to academics and practitioners working in the social sciences and anyone who is seeking greater insight into the intricacies of non-monogamous relationships.
