Handbook On Dementia Caregiving Evidence Based Interventions For Family Caregivers:

Handbook on Dementia Caregiving Richard Schulz, 2000-02-09 This collection provides a comprehensive analysis of intervention approaches to dementia caregiving. It reviews the existing knowledge and provides a conceptual framework for organizing caregiver interventions of all types. Of special interest is the design of an intervention study for a culturally diverse community. The volume concludes with a discussion of how to translate intervention research into public policy with an assessment of the future of caregiving and caregiving intervention research.

Innovative Interventions To Reduce Dementia Caregiver Distress David W. Coon, PhD, Dolores Gallagher-Thompson, PhD, ABPP, Larry W. Thompson, PhD, 2002-10-31 Increasing evidence has demonstrated that caregivers of dementia victims are at risk for depression and other medical problems. In what ways can health care providers improve or maintain the well being of dementia caregivers? This volume provides an overview of emerging themes in dementia caregiving research and presents a broad array of practical strategies for reducing caregiver distress, including interventions for specific populations such as ethnic minority caregivers, male caregivers, and caregivers with diverse sexual orientations. Innovative approaches include the value of partnering with primary care physicians to improve quality of life for both patient and caregiver, and the use of technological advances to help distressed caregivers. A timely cutting edge book written for clinicians of varying backgrounds who provide direct services to families of dementia victims. For Further Information Please Click Here

Human Factors Interventions for the Health Care of Older Adults Wendy A. Rogers, Arthur D. Fisk, 2001-08-01 Written by experts in the field, this book explores the relevance and contributions of the field of human factors to health care. It begins with overviews of the field of human factors and the primary research methodologies of that field and goes on to review the cognitive issues that must be considered in the context of the health care environment and the potential for exercises to improve such cognitive functions. The remaining chapters cover a range of cutting edge topics including care giving telecommunication issues, design of medical devices, computer monitoring of patients, automated communication systems, computer interface issues in general, and the use of the Web as a source for health information.
