Education Office,1969 Children's Literature in Fifth-grade Social Studies Sally Ditmars,1953 **Making a New Nation Level 5-6** Social Studies,2009-07 Nationalism and History Education Rachel Hutchins,2016-02-26 History education by nature transmits an official version of national identity National identity is not a fixed entity and controversy over history teaching is an essential part of the process of redefining and regenerating the nation France and the United States have in particular experienced demographic and cultural shifts since the 1960s that have resulted in intense debates over national identity This volume examines how each country s national history is represented in primary schools social studies textbooks and curricula and how they handle contemporary issues of ethnicity diversity gender socio economic inequality and patriotism By analyzing each country separately and comparatively it demonstrates how various groups including academics politicians and citizen activists have influenced education and how the process of writing and rewriting history perpetuates a nation Drawing on empirical studies of the United States and France this volume provides insight into broader nationalist processes and instructive principles for similar countries in the modern world *Learning From Textbooks* Bruce K. Britton,Arthur Woodward,Marilyn Binkley,2012-11-12 It is surprising that there is so little research on textbooks given their centrality to teaching and learning in elementary and secondary schools Textbooks have become a focus of political and cultural controversy advocating a multicultural curriculum that has sparked some vigorous protests Research is absent in this debate therefore questions of legitimate knowledge the role of textbooks textbook design policy selection issues and economic issues concerning the marketplace are not part of the current debate Without insights of research on considerate text mentioning illustrations and so forth the current controversy will result in publishers responding to demands for more content not less thus textbooks will become compendia of information that on the surface satisfy everyone This volume demonstrates how research on important issues relative to textbook design can advance our knowledge about what makes textbooks effective learning tools and thus inform policymakers publishers and those involved in textbook selection Representing pure and applied approaches researchers present papers on the quality of writing the role of questions the role of pictures and illustrations and the role of auxiliary materials in the design of effective textbooks The chapters provide insight into research and its application to textbook design and improvement stimulating others to follow this lead
