Comparative Analysis of Taxes and CO2 Emissions from Passenger Cars in the Nordic Countries Henrik Duer,Camilla
 Rosenhagen,Nordic Council of Ministers,2011 The report discusses how economic instruments can be used to reduce CO2
 emissions from passenger cars in the Nordic countries The analysis indicate that the registration tax and the annual
 circulation tax can contribute to a reduction in the average CO2 emission from new cars company car schemes in the Nordic
 countries provide incentives for larger cars and increased driving because of subsidies and this has long term effect as a
 large share of new cars are registered as company cars but are used as private cars most of their lives CO2 differentiated
 taxes can provide incentives to consumers to purchase CO2 efficient cars targeted broader packages which besides providing
 tax incentives also offer advantages to more environmentally friendly cars can be more effective than general tax increases
