Handbook of Sustainability Management Christian N. Madu, Chu-hua Kuei, 2012 Sustainability is about the effective management of nonrenewable and nonreplenishable natural resources. These resources are limited and critical to maintaining ecological balance. A collective effort is required to balance our socio-economic needs with environmental needs. This could be achieved by re-evaluating policies and actions as to how they affect the environment. Sustainability requires changes in traditional practices of doing things and refocusing ourselves to the needs of the earth. This handbook explores the role of sustainability in achieving social development, environmental protection, and economic development. These three areas constitute what is referred to as the triple bottom line (TBL). Sustainability management may help organizations and their global supply networks to re-evaluate their policies, processes, programs, and projects in terms of the triple bottom line. Sustainability helps to facilitate planning, implementing, reviewing, and improving an organization's actions and operations to meet ecological goals.

The New International Division of Labour Guido Starosta,2016-06-02 This book revisits the debate over the new international division of labour NIDL that dominated discussions in international political economy and development studies until the early 1990s It submits that a revised NIDL thesis can shed light on the specificities of capitalist development in various parts of the world today Taken together the contributions amount to a novel value theoretical approach to understanding the NIDL This rests upon the distinction between the global economic content that determines the constitution and dynamics of the NIDL and the evolving national political forms that mediate its development More specifically the authors argue that uneven development is an expression of the underlying essential unity of the production of relative surplus value on a world scale They substantiate and illustrate this argument through several international case studies including Argentina Brazil Ecuador Ireland South Korea Spain and Venezuela *Korea Company Handbook* ,2002
