McKitterick, 2022-03-17 This thesis studies the impact of teaching intelligent design to evangelical students Science is often presented as a reason why some find sharing their faith difficult in a secular culture teaching the science of intelligent design

enables Christians to initiate conversations and overcome obstacles with those whose worldview is more Darwinian and materialist The professional doctoral research employs both action research and practical theology Lin Norton s pedagogical action research provides the structure for the qualitative research and thematic analysis showing that students find learning about intelligent design empowering for evangelism Richard Osmer s model of practical theology enables an interdisciplinary reflection on how intelligent design challenges Western secular culture Intelligent design is seen as the most integrative of all the different ways of relating science and theology Theologically teaching intelligent design is like teaching a modern parable to contemporary society and just like the Gospel parables some respond with faith and some reject it Evangelical students find learning about it both liberating and empowering in their ability to share their faith more confidently with others especially in schools and youth groups

Pursuing Wisdom John R. Shoup, Troy W. Hinrichs, Jacqueline N. Gustafson, 2021-10-08 Wisdom considered the highest level of enlightenment has not had a foothold in our education since Plato s Academy and Aristotle s Lyceum Yet it is wisdom that ultimately promotes human flourishing and equips individuals with the sophistication to live life well Wisdom is especially urgent if leaders and followers are to lead and follow well Wisdom is more critical and urgent than ever in today s world Stories of lack of discernment and sound judgment abound in the news Comments such as what were they thinking and why did they do that reveal that wisdom is often painfully lacking when it comes to making decisions The world needs people who judiciously discern and courageously implement innovative decisions at the right time and in the right way But before wisdom can be adequately taught it needs to be properly understood Historically the study and acquisition of wisdom has been reserved to the philosophical and theological fields of study often making wisdom appear esoteric elusive and mysterious While relatively recent empirical attempts have led to certain quantifications and qualifications of wisdom a comprehensive and cohesive model for understanding teaching and implementing general wisdom has yet to emerge Unfortunately philosophical and theological treatises on wisdom have been overly convoluted or mystical making wisdom appear elusive for the lay person The empirical traditions have overanalyzed the concept to make it almost formulaic and uninspiring This primer merges insights from the philosophical theological and empirical traditions to provide a simple model for understanding acquiring practicing and teaching wisdom This primer is unique is that it uses clear language to walk the readers through representative classical philosophical and religious works and empirical studies in lieu of jargon filled meditations As a result the primer orients readers to think like philosophers theologians and social scientists by shepherding them through to the logic of previous works on wisdom What also sets this work apart is its brevity without compromise to substance This primer demonstrates that the complicated can be made relatively simple and that brevity and profound meaning often walk hand in hand Ideal for emerging and established leaders this book demonstrates that wisdom inspires confidence establishes credibility and helps us successfully navigate complex problems and promote human progress This primer makes wisdom accessible and provides all soon to be novice and

seasoned leaders with the understanding dispositions and skills to be discerning and virtuous people others will want to emulate and follow
