Is The Eu Doomed Global Futures:

Is the EU Doomed? Jan Zielonka, 2014-06-05 The European Union is in crisis Crippled by economic problems political brinkmanship and institutional rigidity the EU faces an increasingly uncertain future In this compelling essay leading scholar of European politics Jan Zielonka argues that although the EU will only survive in modest form deprived of many real powers Europe as an integrated entity will grow stronger Integration he contends will continue apace because of European states profound economic interdependence historic ties and the need for political pragmatism A revitalized Europe led by major cities regions and powerful NGOs will emerge in which a new type of continental solidarity can flourish The EU may well be doomed but Europe certainly is not

The Future of Europe Serge Champeau, Carlos Closa, Daniel Innerarity, Miguel Poiares Maduro, 2014-11-03 The European Union seems to have rescued its single currency but it has not yet put an end to the crisis In this major new book a group of fifteen international philosophers economists political scientists sociologists and legal experts compare the economic political constitutional social and cultural interpretations of the European crisis They describe the challenges the EU faces in relation to legitimacy and democracy and address head on the uncertainty over the future of Europe The book considers different possible scenarios from the Union's dissolution with or without the continuation of the integration process to its reinforcement through the building of a political union addressing the challenges of legitimacy democracy and justice Such a strengthened union could mark a new stage for democracy not the democracy of ancient cities and modern states but one convenient to the complex entities neither national nor supra national of which the European Union despite the crisis is still the best modern example

Can We Feed the World Without Destroying It? Eric Holt-Gimenez, 2019-02-25 Nearly a third of the world's population suffers from hunger or malnutrition Feeding them and the projected population of 10 billion people by 2050 has become a high profile challenge for states philanthropists and even the Fortune 500 This has unleashed a steady march of initiatives to double food production within a generation But will doing so tax the resources of our planet beyond its capacity In this sobering essay scholar practitioner Eric Holt Gimenez argues that the ecological impact of doubling food production would be socially and environmentally catastrophic and would not feed the poor We have the technology resources and expertise to feed everyone What is needed is a thorough transformation of the global food regime one that increases equity while producing food and reversing agriculture's environmental impacts

The Europe of Nations and Its Future Adam Wielomski, Magdalena Ziętek-Wielomska, 2017 The topic of the booklet in front of you is the issue of nationalism as well as Euroscepticism in the European Union and in particular a new phenomenon which is emerging before our eyes i.e. nationalism at a European level European nationalism This conceptual cluster is only at a first glance internally contradictory The era when nationalists from one country shot at nationalists from a neighbouring one is a thing of the past In a globalized world and integrated Europe nationalism perceived in such a way is long gone It is a historic relic which could be exhibited in an ideological museum Its last remaining followers

could be dubbed indeed as dinosaurs Contemporary European nationalists or as they describe themselves patriots do not stare into the past and do not cherish memories of prior conflicts Euronationalists are not nostalgic but they are focusing on the future The ascertainment stated above is the result of our trip to the European Parliament in Strasbourg which we took in December of 2015 and our conversations that we had with the members of the European Parliament associated with the Movement for a Europe of Nations and Freedom MENF consisting of so-called Eurosceptics The purpose of this work is to examine the origins the essence and the perspectives of Euro nationalism

The Future of British Foreign Policy Christopher Hill, 2019-03-12 Since 1945 Britain has had to cope with a slow descent from international primacy The decline in global influence was intended to be offset by the United Kingdom's entry into Europe in 1975 with the result that national foreign policy came to rest on the two pillars of the Atlantic alliance and the Common Foreign and Security Policy of the EU Yet with Brexit one of these pillars is now being removed leaving Britain facing some serious challenges arising from the prospect of independence In this incisive book Christopher Hill explores what lies ahead for British foreign policy in the shadows of Brexit and a more distant and protectionist America under Donald Trump While there is much talk of a renewed global profile for the UK Hill cautions that this is going to be difficult to turn into practical reality Geography history and limited resources mean that Britain is doomed to seek a continued foreign policy partnership with the Member States of the Union only now it will be from outside the room looking in As a result there is the distinct possibility that both British and European foreign policies will end up worse off as the result of their divorce

The Lost Future Jan Zielonka, 2023-01-01 A timely and compelling argument for a revitalized and restructured global politics The future seems increasingly uncertain Our democracies are failing to prevent financial crises energy shortages climate change and war so how can we look to the future with confidence Jan Zielonka argues that it is democracy's shortsightedness that makes politics stumble in our increasingly connected world With our governments still confined to the borders of nation states defending the short-term interests of present-day voters the consequences for future generations are dire In this incisive account Zielonka makes a bold case for a new politics of time and space He considers how democracy should adjust to the world of high speed and he questions our everyday experiences as citizens Is it acceptable for authorities and firms to monitor our whereabouts Why is the distribution of time and space so unequal And most crucially can we construct a new system of governance that will allow us to plan ahead with certainty

The United States and the Future of Europe Michael Kaeding, Johannes Pollak, Paul Schmidt, 2025-05-11 This book collects 41 national views from EU Member States and neighbouring countries regarding their respective relationship with the United States It gives evidence of the importance and diversity of transatlantic relations assesses the potentially disruptive impact of a second Trump presidency and offers policy recommendations They range from more strategic autonomy and investments in Europe's security architecture and industrial infrastructure to careful crafting of EU relations with China deeper cooperation in tech and climate policies as well as NATO enlargement While the Trump

administration will likely defend its interests and a preference for divide and conquer the decades old call for Europe to speak with one voice vis vis the U S is louder than ever Nonetheless numerous countries still seem to favour special bilateral ties to the U S The book explores the ebbs and flows of transatlantic relationships and carefully speculates about the next four years

Emerging Conflicts of Principle

Thomas Kane,2013-03-28 Debates over the ethics of war economic redistribution resource consumption and the rights and responsibilities associated with membership of a political community are just some of the major conflicts of principle identified by Thomas Kane which characterize world politics today According to the author debates such as these are being drawn towards increasingly polarized positions represented by strongly universalist and particularist moral and political ideologies such as cosmopolitanism and republicanism Kane analyzes each of these areas identifying that the potential for ideologically driven conflict will constitute the greatest challenge facing scholars and policy makers in the twenty first century

Is the American Century Over? Joseph S. Nye, Jr., 2015-03-05 For more than a century the United States has been the world's most powerful state Now some analysts predict that China will soon take its place Does this mean that we are living in a post American world Will China's rapid rise spark a new Cold War between the two titans In this compelling essay world renowned foreign policy analyst Joseph Nye explains why the American century is far from over and what the US must do to retain its lead in an era of increasingly diffuse power politics America's superpower status may well be tempered by its own domestic problems and China's economic boom he argues but its military economic and soft power capabilities will continue to outstrip those of its closest rivals for decades to come

Tamara Sonn, 2016-11-17 New York Washington Madrid London and now Paris the list of Western cities targeted by radical Islamic terrorists waging global jihad continues to grow Does this extreme violence committed in the name of Islam point to a fundamental enmity between the Muslim faith and the West In this compelling essay leading scholar of Islam Tamara Sonn argues that whilst the West has many enemies among Muslims it is politics not religion that informs their grievances The longer these demands remain frustrated the more violence has escalated and recruitment to groups like Islamic State has

increased Far from quelling the spread of Islamic extremism Western military intervention has helped to turn nationalist movements into radical terrorist groups with international agendas Islam Sonn concludes is not the problem just as war is not the solution
