Why is the term shari'a the mention of which conjures up images of a politicised religion in many parts of the world understood in the ways that it is today For Muslims and non Muslims alike much is read into this term often with scant regard for its historical cultural or theological underpinnings The politics of identity has a profound effect on contemporary life both secular and religious and this includes our understandings of the shari'a Yet at the core of this concept for Muslims is the quest for a moral compass by which to navigate a path through life Qur'an 45:18 informed deeply by revelation and its interpretation by the Prophet Muhammad as well as his closest Companions Built on this foundation is an ongoing human endeavour to grasp and lend expression to that teaching elaborately in law but no less so in devotional ethical and customary practices in diverse Shi'i and Sunni Muslim communities including in the West Popular myths about the shari'a that it is divine law that it is contained in a single code recognised by all Muslims that it is about controlling behavior that it defines Islam are challenged in this volume by leading scholars with a view to illuminating how we arrived here and where we might be headed The claims of the modern state as the custodian of the shari'a are put into perspective alongside the vital role of a pluralist civil society From bioethics human development family law and finance to constitutional and human rights issues this fifth volume in the Muslim Heritage Series offers an accessible account of the ideals and realities of the shari'a As such it will appeal not only to specialists in the humanities and social sciences but also to the general reader with an interest in global affairs and informed citizenship

Muhammad in the Digital Age Ruqayya Yasmine Khan, 2015-11-15 The early twenty first century has experienced an unrivaled dissemination of information and misinformation about Islam its prophet Muhammad and its followers largely facilitated by the fact that the tragedy of 9/11 roughly coincided with the advent of the digital age In the first collection of its kind Ruqayya Khan has compiled essays that treat Muhammad and the core elements of Islam as focal points in an exploration of how the digital era including social media and other expressions have both had an effect on and been affected by Islam Scholars from a variety of fields deal with topics such as the 2005 cartoon controversy in Denmark and the infamous 2012 movie trailer *Innocence of Muslims* that some believe sparked the attacks on the US consulate in Benghazi as well as how the digitization of ancient texts have allowed the origins of Islam to be studied in new ways Other essays examine how Muhammad's wives have been represented in various online sources including a web comic the contrasting depictions of Muhammad as both a warrior and peacemaker and how the widespread distribution of the look of Islamic terrorists has led to attacks on Sikhs whose only point of resemblance to them may be a full beard These findings illuminate the role of the Internet in forms of representation advocacy and engagement concerning Islam and Muslims in our world today

The book includes coverage of newly emerging social and religious phenomena that are only just beginning to be analyzed by religion scholars such as public shrines, the role of the media, spiritual bereavement groups, and the use of the Internet in death practices.

Euthanasia and Assisted Suicide Michael J. Cholbi, 2017-01-26. This book addresses key historical, scientific, legal, and philosophical issues surrounding euthanasia and assisted suicide in the United States as well as in other countries and cultures. Euthanasia was practiced by Greek physicians as early as 500 BC. In the 20th century, legal and ethical controversies surrounding assisted dying exploded. Many religions and medical organizations led the way in opposition, citing the incompatibility of assisted dying with various religious traditions and with the obligations of medical personnel toward their patients. Today, these practices remain highly controversial both in the United States and around the world. Comprising contributions from an international group of experts, this book thoroughly investigates euthanasia and assisted suicide from an interdisciplinary and global perspective. It presents the ethical arguments for and against assisted dying, highlights how assisted dying is perceived in various cultural and philosophical traditions, for example, South and East Asian cultures, Latin American perspectives, and religions including Islam and Christianity, and considers how assisted dying has both shaped and been shaped by the emergence of professionalized bioethics. Readers will also learn about the most controversial issues related to assisted dying, such as pediatric euthanasia, assisted dying for organ transplantation, and suicide tourism, and examine concerns relating to assisted dying for racial minorities, children, and the disabled.
