**MEDINFO 2021: One World, One Health – Global Partnership for Digital Innovation** Paula Otero, Philip Scott, Susan Z. Martin, 2022-08-15 The World Health Organization defines health as a state of complete physical mental and social well being and not merely the absence of disease or infirmity and its constitution also asserts that health for all people is dependent on the fullest co operation of individuals and States The ongoing pandemic has highlighted the power of both healthy and unhealthy information so while healthcare and public health services have depended upon timely and accurate data and continually updated knowledge social media has shown how unhealthy misinformation can be spread and amplified reinforcing existing prejudices conspiracy theories and political biases This book presents the proceedings of MedInfo 2021 the 18th World Congress of Medical and Health Informatics held as a virtual event from 2 4 October 2021 with pre recorded

presentations for all accepted submissions The theme of the conference was One World One Health Global Partnership for Digital Innovation and submissions were requested under 5 themes information and knowledge management quality safety and outcomes health data science human organizational and social aspects and global health informatics The Programme Committee received 352 submissions from 41 countries across all IMIA regions and 147 full papers 60 student papers and 79 posters were accepted for presentation after review and are included in these proceedings Providing an overview of current work in the field over a wide range of disciplines the book will be of interest to all those whose work involves some aspect of medical or health informatics

Medical-Grade Software Development Ilkka Juuso, Ilpo Pöyhönen, 2023-11-13 This book is a practical guide to meeting IEC 62304 software development requirements within the context of an ISO 13485 quality management system QMS The book proves this can be done with a minimum amount of friction overlap and back and forth between development stages It essentially shows you how you should shape your medical software development processes to fit in with the QMS processes in the smartest and leanest way possible By following the advice in this book you can reuse processes from your QMS ensure your product realization processes meet the requirements for medical software development and marry all the requirements together using tried and tested solutions into one efficient system The expertise of the authors here goes beyond just the experiences of one real world project as they tap into over 30 years of experience and countless software and software assessment projects to distill their advice The book takes a hands on approach by first teaching you the top 25 lessons to know before starting to develop a process for medical software development It then walks you through the expectations placed on the key aspects of such a process by the key standards The book progresses from an overview of both standards and the general requirements involved to a detailed discussion of the expected stages from software development and maintenance to risk management configuration management and problem resolution The book provides insightful advice on how the requirements of the IEC 62304 software development life cycle can be married with an ISO 13485 QMS how the development of the technical file should be organized and how to address conformity assessment the daily after approval and the recent trends that will affect the industry in the coming years The book is modeled after the IEC 62304 standard and adopts its clause structure in the numbering of sections for easy reference The book does not attempt to replicate either standard For the ISO 13485 standard it recites the necessary requirements succinctly For IEC 62304 the discussion is in depth and also addresses the impact of ISO 13485 on the requirements discussed In this way the book drills into both standards to expose the core of each requirement and shape these into a practical cohesive workflow for developing maintaining and improving a Lean software development pipeline
