Static Electricity

Static electricity is the transfer of negatively charged particles between materials. Clothes sticking together when coming out of the dryer is an example of static electricity. Another example is lightning.

Electromagnets

A current flowing through a wire creates a magnetic field. Wrapping a wire around metal containing iron and creating a closed circuit makes an **electromagnet**.

Items needed to make an electromagnet:

- battery
- wire
- nail (or other metal object containing iron)

You can change the strength of an electromagnet by:
