God, Greed, and Genocide Arthur Grenke, 2005 What are the similarities between the mass extermination of idolaters in the Old Testament the burning of witches in the Middle Ages the extermination of native Americans the mass killing of the Armenians at the hand of the Turks the Holocaust of the European Jews and the communist eradication of the enemies of the people both in the Soviet Union and Cambodia Are these to be seen as unique cases or as the result of a recognizable pattern The author provides insight into these questions basing his argument on the latest sources He maintains that the study of the dynamics that lead to mass destruction may provide a better understanding of the Holocaust as a recurrent phenomenon

Historical Origins of International Criminal Law Morten Bergsmo, CHEAH Wui Ling, YI Ping, 2014-12-12 The historical origins of international criminal law go beyond the key trials of Nuremberg and Tokyo but remain a topic that has not received comprehensive and systematic treatment This anthology aims to address this lacuna by examining trials proceedings legal instruments and publications that may be said to be the building blocks of contemporary international criminal law It aspires to generate new knowledge broaden the common hinterland to international criminal law and further consolidate this relatively young discipline of international law The anthology and research project also seek to question our fundamental assumptions of international criminal law by going beyond the geographical cultural and temporal limits set by the traditional narratives of its history and by questioning the roots of its substance process and institutions Ultimately we hope to raise awareness and generate further discussion about the historical and intellectual origins of international criminal law and its social function The contributions to the three volumes of this study bring together experts with different professional and disciplinary expertise from diverse continents and legal traditions Volume 1 comprises contributions by prominent international lawyers and researchers including Judge LIU Daqun Professor David Cohen Geoffrey Robertson QC Professor Paulus Mevis and Professor Jan Reijntjes **A Cultural History of Genocide in the Early Modern World** Igor Pérez Tostado, 2023-05-04 Historical studies of genocide in the 20th century trace the roots back to the sociopolitical economic and cultural developments of the early modern period From globalization to urbanization to imperialism state formation and homogenization from religious warfare to enlightenment to racism many factors connected with genocide first emerged or vastly developed between the 15th and 18th centuries While the early modern period did not have a crime of genocide it possessed its own legal system which contemplated the rightful destruction of whole peoples and a political culture that sanctioned the use of mass violence As a result early modern genocide has been denied or blurred as a regrettable side effect of the global circulation of ideas goods and peoples and the creation of new societies cultures and

languages arising from it This collection looks at the different genocides which unfolded around the globe emphasizing its gendered dimension and its disproportionate and enduring impact on indigenous populations Although European imperialism and homogenization play a central role it aims more widely to cover the principal agents victims and rationale for genocide in the early modern world As a whole this volume aims at fostering the debate on the early modern history of genocide not as an insulated or secondary subject but as a central issue of the era with profound implications for our own

The Crucifixion of the Warrior God Gregory A. Boyd, 2017-04-17 The Crucifixion of the Warrior God in an epic constructive investigation takes up the set of dramatic tensions between depictions of divinely sanctioned violence in Scripture and the message and life of peace of Jesus centering the New Testament Over two volumes author Gregory A Boyd argues that we must take seriously the full range of Scripture as inspired and the centrality of the crucified and risen Christ as the supreme revelation of God

Emotions, Decision-Making and Mass Atrocities Olaoluwa Olusanya, 2016-05-06 This book rehumanizes perpetrators of mass atrocities At present a victim perpetrator dichotomy appears to be the dominant paradigm perpetrators have either been mechanistically dehumanized that is perceived as unemotional hard hearted and conforming and thereby lacking the core features of human nature or alternatively they have been animalistically dehumanized In other words they are seen as immoral unintelligent lacking self control and likened to animals Within sociology and criminology the dominant view is that genocide and other mass atrocities are committed by technologically lobotomized perpetrators Somehow the process of rationalization is believed to have transformed these people from emotionally healthy people into hollow soulless shells of human beings or zombies devoid of a full range of normal emotions These people are considered bereft of any ability to reason think or feel yet ambulant and able to respond to surrounding stimuli However it is difficult to imagine crime especially those involving a group of people working together for the duration of a particular criminal activity without emotions For instance there is ample evidence suggesting that both crimes of passion and pre-meditated crimes involve emotional arousal Furthermore research in fields such as evolutionary biology psychology and sociology of work and organizations suggest that emotions are essential for human progress and survival In addition emotions help us make the right call in risky and uncertain situations in other words the majority of real life situations There is therefore a need to revisit existing assumptions around the role of emotions in mass atrocities
