Before Auschwitz Paul R. Hinlicky, 2013-06-27 What can Christian theology in North America learn from the rise of Nazism in Germany in the 1920s and 1930s This book explores an explosion of scholarship in recent decades that has reopened questions once thought to be settled about the relationships between Nazism Liberalism and Christianity In the process of criticizing the retrospective fallacy and urging a properly hermeneutical historiography its method in historical theology causes us to reflect back upon our tacit commitments suggesting that we are closer to fascism than we are aware and that although the devil never shows its face twice in exactly the same way the particular hubris of grasping after final solutions along biopolitical lines that is the racially scientific version of fascism that was Nazism is and remains near at hand today within our horizon of possibilities unrecognized in just the ways that it was unrecognized by Germans before Auschwitz The book takes a fresh look at the theology of Adolf Hitler and finds themes that are disturbingly familiar It summons to the renewal of Christian theology after Christendom in the form of critical dogmatics where the motif of the Beloved Community replaces the fallen idol descended from Charlemagne

Religion, Race, Rights Eve Darian-Smith, 2010-05-20 The book highlights the interconnections between three framing concepts in the development of modern western law religion race and rights The author challenges the assumption that law

is an objective rational and secular enterprise by showing that the rule of law is historically grounded and linked to the particularities of Christian morality the forces of capitalism dependent upon exploitation of minorities and specific conceptions of individualism that surfaced with the Reformation in the sixteenth century and rapidly developed in the Enlightenment in the seventeenth and eighteenth centuries Drawing upon landmark legal decisions and historical events the book emphasises that justice is not blind because our concept of justice changes over time and is linked to economic power social values and moral sensibilities that are neither universal nor apolitical Highlighting the historical interconnections between religion race and rights aids our understanding of contemporary socio legal issues In the twenty first century the economic might of the USA and the west often leads to a myopic vision of law and a belief in its universal application This ignores the cultural specificity of western legal concepts and prevents us from appreciating that analogous to previous colonial periods in a global political economy Anglo American law is not always transportable transferable or translatable across political landscapes and religious communities

The Idea of Justice Amartya Sen,2011-05-31 More than a matter of intellectual discourse the idea of justice plays a real role in how and how well people live Here Amartya Sen offers a powerful critique of the theory of social justice that in its grip on social and political thinking has long left practical realities far behind

The New Threat Jason Burke,2017-03-07 From Syria to Somalia from Libya to Indonesia from Yemen to the capitals of Europe Islamic militancy appears stronger more widespread and more threatening than ever In The New Threat prizewinning frontline reporter Jason Burke cuts through the mass of opinion and misinformation to explain the nature of the threat we now face Shortlisted for the Orwell Prize The New Threat offers insight into the rise of ISIS and other groups such as Boko Haram which together command significant military power rule millions and control extensive territories Elsewhere Al Qaeda remains potent and is rapidly evolving As a new generation of Western extremists emerges as seen by the horrifying attacks in Paris and Brussels as well as the lone wolf operatives in the United States Burke argues it is imperative that we understand who these groups are and what they actually want

All Things Medieval Ruth A. Johnston,2011-08-15 This insightful survey of the things of medieval Europe allows modern readers to understand what they looked like what they were made of how they were created and how they were used All Things Medieval An Encyclopedia of the Medieval World covers the widest definition of medieval Europe possible not by covering history in the traditional textbook manner of listing wars leaders and significant historic events but by presenting detailed alphabetical entries that describe the artifacts of medieval Europe By examining the hidden material culture and by presenting information about topics that few books cover pottery locks and keys shoes weaving looms barrels toys pets ink kitchen utensils and much more readers get invaluable insights into the nature of life during that time period and area The heartland European regions such as England France Italy and Germany are covered extensively and information regarding the objects of regions such as Byzantium Muslim Spain and Scandinavia are also included For each topic of material culture the entry considers the full scope of the medieval period

roughly 500 1450 to give the reader a historical perspective of related traditions or inventions and describes the craftsmen and tools that produced it Historical Dictionary of the Crusades Corliss K. Slack, 2013-05-09 The crusades were among the longest and most bitter wars in human history and consisted of no less than seven major expeditions from Western Europe from the late 11th to the early 14th centuries for the purpose of wresting Jerusalem and the Holy Land from the control of the Muslims In the end it was the Muslims who won and the Christians who suffered a major setback and the Middle East remained firmly in Muslim hands This was one of the worst clashes between different religions and civilizations and for long it was largely forgotten or brushed over That is no longer the case with many Muslims regarding Western interference in the region as a repeat of the crusades while launching their own jihads So while an old conflict it is still with us today Even at the time it was very hard to understand the causes and outcome of the crusades and that remains a problem today This Historical Dictionary of the Crusades cannot claim to have resolved it but it most definitely does make the situation easier to understand The introduction provides an overview tracing the crusades from one expedition to the next and assessing their impact The actual flow of events is far easier to follow thanks to the chronology And maps help to trace the events geographically The entries and there are more than 300 of them in this second edition look more closely at notable figures including Pope Gregory VII Richard the lionhearted and Saladin as well as important places Jerusalem Constantinople and others events battles and sieges as well as the use of weapons and armor The bibliography points to further reading

Media, Culture and Human Violence Jeff Lewis, 2015-11-18 Humans of the advanced world are the most violent beings of all times This violence is evident in the conditions of perpetual warfare and the accumulation of the most powerful and destructive arsenal ever known to humankind It is also evident in the devastating impact of advanced world economy and cultural practices which have led to ecological devastation and the current era of mass species extinction one of only six mass extinction events in planetary history and the only one caused by the actions of a single species humans This violence is manifest in our interpersonal relationships and the ways in which we organize ourselves through hierarchical systems that ensure the wealth and privilege of some against the penury and misery of others In this new and highly original book Jeff Lewis argues that violence is deeply inscribed in human culture thinking and expressive systems media Lewis contends that violence is not an inescapable feature of an aggressive human nature Rather violence is laced through our desires and dispositions to communalism and expressive interaction From the near extinction of all Homo sapiens around 74 000 years ago the invention of culture and media enabled humans to imagine and articulate particular choices and pleasures Organized intergroup violence or warfare emerged through the exercise of these choices and their expression through larger and increasingly complex human societies This agitation of amplified desire hierarchical social organization and mediated knowledge systems has created a cultural volition of violent complexity which continues into the present Media Culture and Human Violence examines the current conditions of conflict and harm as an expression of our violent complexity

Goldenberg, 2017-05-22 Studies of the Curse of Ham the belief that the Bible

consigned blacks to everlasting servitude confuse and conflate two separate origins stories etiologies one of black skin and the other of black slavery This work unravels the etiologies and shows how the Curse an etiology of black slavery evolved from an earlier etiology explaining the existence of dark skinned people We see when where why and how an original mythic tale of black origins morphed into a story of the origins of black slavery and how in turn the second then supplanted the first as an explanation for black skin In the process we see how formulations of the Curse changed over time depending on the historical and social contexts reflecting and refashioning the way blackness and blacks were perceived In particular two significant developments are uncovered First a curse of slavery originally said to affect various dark skinned peoples was eventually applied most commonly to black Africans Second blackness originally incidental to the curse in time became part of the curse itself Dark skin now became an intentional marker of servitude the visible sign of the blacks degradation and in the process deprecating black skin itself Understanding Afghanistan Abdul Qayyum, 2021-10-06 This book delves into the history of Afghanistan its people and its relationship with neighbors to unravel the intricate politics and ethnolinguistic diversity of the country It discusses the history of innumerable invasions which left imprints over the country and its people

The Muslim Speaks Khurram Hussain, 2020-10-29 The Muslim Speaks reimagines Islam as a strategy for investigating the modern condition Rather than imagining it as an issue external to a discrete West Khurram Hussain constructs Islam as internal to the elaboration and expansion of the West In doing so he reveals three discursive traps that of freedom reason and culture that inhibit the availability of Islam as a feasible critical interlocutor in Western deliberations about moral intellectual and political concerns Through close examination of this inhibition Hussain posits that while Islamophobia is clearly a moral wrong depoliticization more accurately describes the problems associated with the lived experience of Muslims in the West and elsewhere Weaving together his conclusions in the hope of a common world Khurram Hussain boldly and quite radically deems that what Islam needs is not depoliticization but infact repoliticization
