Cross-cultural Visions in African American Modernism Yoshinobu Hakutani, 2006 Yoshinobu Hakutani traces the development of African American modernism which initially gathered momentum with Richard Wright's literary manifesto *Blueprint for Negro Writing* in 1937. Hakutani dissects and discusses the cross-cultural influences on the then burgeoning discipline in three stages: American dialogues, European and African cultural visions, and Asian and African American cross-cultural visions. In writing *Black Boy*, the centerpiece of the Chicago Renaissance, Wright was inspired by Theodore Dreiser. Because the European and African cultural visions that Wright, Ralph Ellison, Alice Walker, and Toni Morrison acquired were buttressed by the universal humanism that is common to all cultures, this ideology is shown to transcend the problems of society. Fascinated by Eastern thought and art, Wright, Walker, Sonia Sanchez, and James Emanuel wrote highly accomplished poetry and prose. Like Ezra Pound, Wright was drawn to classic haiku as reflected in the 4,000 haiku he wrote at the end of his life. As W.B. Yeats's symbolism was influenced by his cross-cultural visions of Noh theatre and Irish folklore, so is James Emanuel's jazz haiku energized by his cross-cultural rhythms of Japanese poetry and African American music. The book demonstrates some of the most visible cultural exchanges in modern and postmodern African American literature. Such a study can be extended to other contemporary African American writers whose works also thrive on their cross-cultural visions, such as Amiri Baraka, Ishmael Reed, Charles Johnson, and haiku poet Lenard Moore.

Human Test Ron Folman, 2025-03-25 Discover how artificial intelligence will challenge everything we believe about consciousness, free will, creativity, and what makes us truly human. In an era when AI will soon predict our breakfast choices, shopping habits, and romantic attractions with uncanny accuracy, quantum physicist Ron Folman poses a provocative question: If we're this predictable, are we truly conscious beings with free will, or simply sophisticated machines? Drawing from quantum physics, cognitive science, philosophy, and rising technologies, *The Human Test* explores how the rise of AI and Big Data is forcing us to confront uncomfortable truths about human nature. As technology evolves to predict our behavior with increasing precision, Folman challenges us to reconsider what it means to be truly alive and conscious. Specifically, he shows by way of a breathtaking narrative that already in the very near future, nonconscious AI will give rise to the most profound experiment ever performed on humans, providing us for the first time with quantitative answers to these core human enigmas. But within this seemingly dystopian future lies an unexpected source of hope: our capacity for creativity. Folman reveals how this uniquely human trait might be the key to maintaining our humanity in an age of algorithmic predictability. Moreover, as he journeys to the nucleus of creativity, he suggests effective ways to enhance and empower its horizon. *The Human Test* isn't just another book about AI; it's a profound investigation into what makes us human and how we can remain so in a world that increasingly treats us as data points to be predicted and controlled.

Intercultural Phenomenology Yuko Ishihara,Steven A. Tainer,2023-12-28 Intercultural Phenomenology explores the nature of reality by engaging in a cross cultural dialogue between two of the most influential philosophical traditions of the 20th century Drawing on ideas from phenomenology Japanese philosophy and Zen Buddhism it follows the philosophers who changed their perception of the world by choosing to suspend judgement Guided by this philosophical method known as the epoch or suspension of judgment in ancient Greek it is an introduction to the philosophy and practice of letting objects in the world speak for themselves Inspired by Nishida Kitaro s insight that true reality is beyond the subject object duality the book uses a series of examples and exercises to explore the background to Husserl s idea of the phenomenological epoch Hans Georg Gadamer s emphasis on play in human understanding and the haiku poet Matsuo Basho s call for a new level of freedom This practice oriented approach moves beyond the traditional East West divide It connects various traditions old and new contemplative and theoretical and explains why Japanese philosophy and phenomenology can enrich the quality of our lived experience
