Morioka,2006-03-21 Each and every hair is much more than just the visible shaft there are also associated complex sheath structures of epidermal and dermal origin In the hair follicle cells undergo a variety of differentiation processes mostly depending on their layers and positions therein and electron microscopy reveals a very complex architecture The structure of a particular layer such as

Henle's layer of the inner root sheath is not uniform. Rather, cells drastically change during the course of differentiation. By simply comparing electron micrographs of cells of a layer at different degrees of differentiation, one can hardly recognize them as belonging to the same layer. As readers will see, this book contains many superb electron micrographs from low magnification panoramic views for orientation to high power views showing ultrastructural detail. Captions and schematic drawings are also very helpful in reading electron micrographs and understanding the structural detail. In this way, Dr. Morioka has succeeded in dissecting the complex hair follicle at the ultrastructural level. The Science of Transitioning Audrey

Davis-Sivasothy, 2015-12-22 Thinking about making the journey back to natural? Here's your roadmap. Thinking outside the box is not always easy, especially when you've had a long-term relationship with your relaxer. And, of course, rocking gravity-defying kinks and coils comes with another set of unique joys and challenges. *The Science of Transitioning: A Complete Guide to Hair Care for Transitioners and New Naturals* is your essential, all-inclusive guide to the journey back, written exclusively for those who are chemically relaxed and considering the natural journey, those who are taking their first steps back to natural, and those who have already gone all in. Unleash your hair's fullest potential and learn how to care for the natural kinks, coils, and curls you were born with. Best for those who are currently relaxed and considering natural hair. Transitioners: Long-term and short-term transitions. New Naturals: Recently chopped or natural for less than 2 years. You'll discover how chemical relaxers really affect the hair and scalp, how to transition while keeping your hair as healthy as possible, the best products and techniques to use during your transition, how your mental transition determines the success of your physical transition, tips for dealing with unsupportive friends and family members, tips for getting the most out of your new natural hair, what's inside: Regimen advice for both transitioners and new naturals, Sample Transitioning Timeline and care instructions to carry you through the first year of transitioning, More than one hundred illustrations and directions for handling and styling transitioning and newly natural hair, New updated images of hair at the microscopic level, Product suggestions, sample regimens, and more. *Surface Science and Adhesion in Cosmetics* K. L. Mittal, H. S. Bui, 2021-04-06

Activity in the arena of surface chemistry and adhesion aspects in cosmetics is substantial, but the information is scattered in many diverse publications, media, and no book exists which discusses surface chemistry and adhesion in cosmetics in a unified manner. This book, containing 15 chapters written by eminent researchers from academia and industry, is divided into three parts: Part 1: General Topics; Part 2: Surface Chemistry Aspects; and Part 3: Wetting and Adhesion Aspects. The topics covered include: Lip biophysical properties and characterization; use of advanced silicone materials in long-lasting cosmetics; non-aqueous dispersions of acrylate copolymers in lipsticks; cosmetic oils in lipstick structure; chemical structure of the hair surface; surface forces and interactions; AFM for hair surface characterization; application of AFM in characterizing hair skin and cosmetic deposition; SIMS as a surface analysis method for hair skin and cosmetics; surface tensiometry approach to characterize cosmetic products; spreading of hairsprays on hair; color transfer from long-wear face foundation products.
