nation in a newly progressive direction Civic Passions reminds us that one determined individual can make a difference

History of medicine and surgery and physicians and surgeons of Chicago ,1922 **Bibliography of the History of Medicine** ,1979 **Sifting the Trash** Alice Twemlow,2017-05-19 How product design criticism has rescued some products from the trash and consigned others to the landfill Product design criticism operates at the very brink of the landfill site salvaging some products with praise but consigning others to its depths through condemnation or indifference When a designed product s usefulness is past the public happily discards it to make room for the next new thing Criticism rarely deals with how a product might be used or not used over time it is more likely to play the enabler encouraging our addiction to consumption With Sifting the Trash Alice Twemlow offers an especially timely reexamination of the history of product design criticism through the metaphors and actualities of the product as imminent junk and the consumer as junkie Twemlow explores five key moments over the past sixty years of product design criticism From the mid 1950s through the 1960s for example critics including Reyner Banham Deborah Allen and Richard Hamilton wrote about the ways people actually used design and invented a new kind of criticism At the 1970 International Design Conference in Aspen environmental activists protested the design establishment s lack of political engagement In the 1980s left leaning cultural critics introduced ideology to British design criticism In the 1990s dueling London exhibits offered alternative views of contemporary design And in the early 2000s professional critics were challenged by energetic design bloggers Through the years Twemlow shows critics either sifted the trash and assigned value or attempted to detect diagnose and treat the sickness of a consumer society
