Handbook Of Nonwoven Filter Media Handbook Of Nonwoven Filter Media:

Handbook of Nonwoven Filter Media Irwin M. Hutten, 2015-10-24 The Handbook of Nonwoven Filter Media Second Edition provides readers with a fundamental understanding of nonwoven filter media. It is one of the few books dealing exclusively with the subject and is primarily intended as a reference for people in the nonwovens industry and academic researchers, technical marketing and quality control personnel, and universities offering courses in filtration theory and practice and nonwovens technology. The book includes applications for gas, liquid, and engine filtration and identifies the types of filter media used in these applications. The various separation technologies that can be achieved with nonwoven filter media are revealed and discussed. Theoretical presentation is based on flow through porous media and is developed around a nonwovens or engineered fabrics orientation. Presents the latest information on legislative, regulatory, environmental, and sustainability issues affecting the nonwovens and filtration industries. Includes a comprehensive discussion of Computational Flow Dynamics (CFD) by Dr. George Chase, University of Akron, USA. Includes the latest Global and North American marketing statistics for filters and filter media prepared by Brad Kalil of INDA. [Handbook of Nonwoven Filter Media](#) Irwin M. Hutten, 2007-03-23 The increasing importance of nonwoven filter media is due in part to their versatility; they are used in the pre-filtration of liquids, protection of membrane filters, gaseous filtration, the automotive industry, air purification, wet filtration, and many household uses. Despite this, no comprehensive account of these media has existed until now. Irwin Marshall Hutten is well known throughout the nonwoven industry and brings enormous experience and knowledge to this Handbook. All aspects of the properties, formation, materials, types of filters, applications, test methods, and standards are to be found within this volume. Provides practical advice on applications of nonwoven filter media. Discusses in detail the raw materials and manufacturing process. Offers definitions and classifications for nonwoven filter media. **Handbook of Nonwoven Filter Media** Irwin M.
