Handbook Of Paleolithic Typology Lower And Middle Paleolithic Of Europe:

Handbook of Paleolithic Typology André Debénath, Harold L. Dibble, 1994 This book presents the major tool types of European Lower and Middle Paleolithic Building on the typelist of the late Francois Bordes with many forms that have been recognized since it presents working definitions of the types with illustrations and discussions of the variability inherent to lithic typologies The authors combine classic typological views with current notions of lithic typological variation This handbook represents not only an important reference source for gaining a practical understanding of how Lower and Middle Paleolithic typology is applied but of the nature of lithic variability in other kinds of assemblages as well Handbook of Paleolithic Typology Andr{uFFFFD} Deb{uFFFFD}nath, Harold L. Dibble, 2015 This book presents the major tool types of European Lower and Middle Paleolithic Building on the typelist of the late Francois Bordes with many forms that have been recognized since it presents working definitions of the types with illustrations and discussions of the variability inherent to lithic typologies The authors combine classic typological views with current notions of lithic typological variation This handbook represents not only an important reference source for gaining a practical understanding of how Lower and Middle Paleolithic typology is applied but of the nature of lithic variability in other kinds of assemblages as well **Handbook of Paleolithic Typology** Andre Debenath, Harold L. Dibble, 2015-03-27 This book presents the major tool types of European Lower and Middle Paleolithic Building on the typelist of the late Francois Bordes with many forms that have been recognized since it presents working definitions of the types with illustrations and discussions of the variability inherent to lithic typologies The authors combine classic typological views with current notions of lithic typological variation This handbook represents not only an important reference source for gaining a practical understanding of how Lower and Middle Paleolithic typology is applied but of the nature of lithic variability in other kinds of assemblages as well **The Middle Paleolithic Site of Combe-Capelle Bas (France)** Harold L. Dibble, Michel Lenoir, 1995-01-29 This report presents the new excavations at Combe Capelle Bas a Middle Paleolithic site in southern France The site is situated directly on a source of good quality flint and recent theories suggest that such a setting may have certain predictable effects on the lithic industries These effects and others relating to current models of raw material procurement and use are discussed This book will appeal to anyone interested in Paleolithic archaeology lithic analysis raw material use and site formation and taphonomy University Museum Monograph 91 The Middle Paleolithic Site of Pech de l'Azé IV Harold L. Dibble, Shannon J. P. McPherron, Paul Goldberg, Dennis M. Sandgathe, 2017-10-24 This book provides comprehensive information on the materials excavated at Pech de l Az IV both by the original excavator Fran ois Bordes in the 1970s and more recently by the authors and their scientific team Applying a range of new excavation and analytical techniques it presents detailed material on the formation of the site its chronology and the nature of the hominin occupations Pech de l Az IV is part of a complex of Lower and Middle Paleolithic cave sites in the Dordogne Valley of southwestern France Although this region is well known for its rich

concentration of Paleolithic sites since the mid 19th century and many of the sites have been repeatedly excavated no detailed studies have fully documented the stone tool technology and faunal remains or the changes in them over time The site was regularly occupied by groups of Neanderthals from approximately 100 000 to 40 000 years ago during which time global scale changes transformed the region from a relatively warm climate similar to today s to a very cold glacial one The site provides valuable insights into changes in Neanderthal behavior that reflect at least in part their adaptation to changes in the environment and the availability of important resources such as prey species *Paleoanthropology of the Balkans and Anatolia* Katerina Harvati, Mirjana Roksandic, 2017-01-18 This edited volume systematically reviews the evidence for early human presence in one of the most relevant geographic regions of Europe the Balkans and Anatolia an area that has been crucial in shaping the course of human evolution in Europe but whose paleoanthropological record is poorly known The primary aim of this book is to showcase new paleoanthropological human paleontological and paleolithic research conducted in the region The volume is organized into three sections The first one deals with the human fossil record from Greece the Central Balkans Croatia Romania Bulgaria and Turkey The second section presents the paleolithic record of the same countries In the third part the authors provide a synthesis of current paleoenvironmental evidence for the Balkans Chapters summarize and systematize the available human fossil evidence examine their context and place them within the framework of our understanding of human evolution in Europe and beyond as well as present new analyses of existing human fossils This book will be of interest to professionals upper undergraduate and graduate students in paleoanthropology human paleontology and paleolithic archaeology and in a variety of related fields including human variation and adaptation paleontology and biogeography It will also be appropriate as a reference book for advanced undergraduate and graduate courses on human evolution and European paleoanthropology **Prehistoric Ukraine** Malcolm C. Lillie, Inna D. Potekhina, 2020-09-30 This volume covers the Prehistory of Ukraine from the Lower Palaeolithic through to the end of the Neolithic periods This is the first comprehensive synthesis of Ukrainian Prehistory from earliest times through until the Neolithic Period undertaken by researchers who are currently investigating the Prehistory of Ukraine At present there are no other English language books on this subject that provide a current synthesis for these periods The chapters in this volume provide up to date overviews of all aspects of prehistoric culture development in Ukraine and present details of the key sites and finds for the periods studied The book includes the most recent research from all areas of prehistory up to the Neolithic period and in addition areas such as recent radiocarbon dating and its implications for culture chronology are considered as is a consideration of aDNA and the new insights into culture history this area of research affords alongside recent macrofossil studies of plant use and anthropological and stable isotope studies of diet which all combine to allow greater insights into the nature of human subsistence and cultural developments across the Palaeolithic to Neolithic periods in Ukraine It is anticipated that this book will be an invaluable resource for students of prehistory throughout Europe in

providing an English language text that is written by researchers who are active in their respective fields and who possess an intimate knowledge of Ukrainian prehistory **Stone Tools in the Paleolithic and Neolithic Near East** John J.

Shea,2013-02-28 **Stone Tools in the Paleolithic and Neolithic Near East** A Guide surveys the lithic record for the East Mediterranean Levant Lebanon Syria Israel Jordan and adjacent territories from the earliest times to 6 500 years ago It is intended both as an introduction to this lithic evidence for students and as a resource for researchers working with Paleolithic and Neolithic stone tool evidence Written by a lithic analyst and professional flintknapper this book systematically examines variation in technology typology and industries for the Lower Middle and Upper Paleolithic the Epipaleolithic and Neolithic periods in the Near East It is extensively illustrated with drawings of stone tools In addition to surveying the lithic evidence the book also considers ways in which archaeological treatment of this evidence could be changed to make it more relevant to major issues in human origins research A final chapter shows how change in stone tool designs point to increasing human dependence on stone tools across the long sweep of Stone Age prehistory **Handbook of Evolutionary**

Research in Archaeology Anna Marie Prentiss,2019-06-03 **Evolutionary Research in Archaeology** seeks to provide a comprehensive overview of contemporary evolutionary research in archaeology The book will provide a single source for introduction and overview of basic and advanced evolutionary concepts and research programs in archaeology Content will be organized around four areas of critical research including microevolutionary and macroevolutionary process human ecology studies evolutionary ecology demography and niche construction and evolutionary cognitive archaeology Authors of individual chapters will address theoretical foundations history of research contemporary contributions and debates and implications for the future for their respective topics As appropriate authors present or discuss short empirical case studies to illustrate key arguments Stone Tools in Human Evolution John J. Shea,2016-11-07 In **Stone Tools in Human Evolution**

John J Shea argues that over the last three million years hominins technological strategies shifted from occasional tool use much like that seen among living non human primates to a uniquely human pattern of obligatory tool use Examining how the lithic archaeological record changed over the course of human evolution he compares tool use by living humans and non human primates and predicts how the archaeological stone tool evidence should have changed as distinctively human behaviors evolved Those behaviors include using cutting tools logistical mobility carrying things language and symbolic artifacts geographic dispersal and diaspora and residential sedentism living in the same place for prolonged periods Shea then tests those predictions by analyzing the archaeological lithic record from 6 500 years ago to 3 5 million years ago

Neandertal Lithic Industries at La Quina Arthur J. Jelinek,2013-04-18 This book employs new analytical techniques to expand our knowledge of Neandertal life in what is now southwestern France Written by a senior researcher who developed sophisticated methods for analyzing chipped stone and animal bone artifacts it adds significantly to scientific understanding of the Neandertals Taxonomic Tapestries Alison M Behie,Marc F Oxenham,2015-05-26 This volume explores the

complexity diversity and interwoven nature of taxonomic pursuits within the context of explorations of humans and related species It also pays tribute to Professor Colin Groves whose work has had an enormous impact on this field Recent research into that somewhat unique species we call humankind through the theoretical and conceptual approaches afforded by the discipline of biological anthropology is showcased The focus is on the evolution of the human species the behaviour of primates and other species and how humans affect the distribution and abundance of other species through anthropogenic impact Weaving together these three key themes through the considerable influence of Colin Groves provides glimpses of how changes in taxonomic theory and methodology including our fluctuating understanding of speciation have recrafted the way in which we view animal behaviour human evolution and conservation studies *Projectile Technology* Heidi

Knecht,2013-06-29 Artifacts linked to projectile technologies traditionally have provided the foundations for time space systematics and cultural historic frameworks in archaeological research having to do with foragers With the shift in archaeological research objectives to processual interpretations projectile technologies continue to receive marked attention but with an emphasis on the implications of variability in such areas as design function and material as they relate to the broader questions of human adaptation The reason that this particular domain of foraging technology persists as an important focus of research I think comes in three parts A projectile technology was a crucial part of most foragers strategies for survival it was functionally specific and it generally was fabricated from durable materials likely to be detected archaeologically Being fundamental to meat acquisition and the principal source of calories projectile technologies were typically afforded greater time investment formal modification and elaboration of attributes than others Moreover such technologies tend to display greater standardization because of constraints on size morphology and weight that are inherent to the delivery system The elaboration of attributes and standardization of form gives projectile technologies time and space sensitivity that is greater than most other foraging technologies And such sensitivity is immensely valuable in archaeological research

Archaeology in Practice Jane Balme,Alistair Paterson,2014-01-14 This much enhanced new edition of the highly accessible guide to practical archaeology is a vital resource for students It features the latest methodologies a wealth of case studies from around the world and contributions from leading specialists in archaeological materials analysis New edition updated to include the latest archaeological methods an enhanced focus on post excavation analysis and new material including a dedicated chapter on analyzing human remains Covers the full range of current analytic methods such as analysis of stone tools human remains and absolute dating Features a user friendly structure organized according to material types such as animal bones ceramics and stone artifacts as well as by thematic topics ranging from dating techniques to report writing and ethical concerns Accessible to archaeology students at all levels with detailed references and extensive case studies featured throughout **Artifact Classification** Dwight W Read,2016-09-16 Archaeologists have been developing artifact typologies to understand cultural categories for as long as the discipline has existed Dwight Read examines these

attempts to systematize the cultural domains in premodern societies through a historical study of pottery typologies He then offers a methodology for producing classifications that are both salient to the cultural groups that produced them and relevant for establishing cultural categories and timelines for the archaeologist attempting to understand the relationship between material culture and ideational culture of ancient societies This volume is valuable to upper level students and professional archaeologists across the discipline

Archaeological Variability and Interpretation in Global Perspective Alan P. Sullivan, Deborah Irene Olszewski, 2016-12-01 In *Archaeological Variability and Interpretation in Global Perspective* contributors illustrate the virtues of various ecological experimental statistical typological technological and cognitive social approaches for understanding the origins formation histories and inferential potential of a wide range of archaeological phenomena As archaeologists worldwide create theoretically inspired and methodologically robust narratives of the cultural past their research pivots on the principle that determining the origins and histories of archaeological phenomena is essential in understanding their relevance for a variety of anthropological problems The chapters explore how the analysis of artifact assemblage and site distributions at different spatial and temporal scales provides new insights into how mobility strategies affect lithic assemblage composition what causes unstable interaction patterns in complex societies and which factors promote a sense of place in landscapes of abandoned structures In addition several chapters illustrate how new theoretical approaches and innovative methods promote reinterpretations of the regional significance of historically important archaeological sites such as Myrtos Pyrgos Crete Greece Aztalan Wisconsin USA Tabun Cave Israel and Casas Grandes Chihuahua Mexico The studies presented in *Archaeological Variability and Interpretation in Global Perspective* challenge orthodoxy raise research worthy controversies and develop strong inferences about the diverse evolutionary pathways of humankind using theoretical perspectives that consider both new information and preexisting archaeological data Contributors C Michael Barton Brian F Byrd Gerald Cadogan Philip G Chase Harold L Dibble Matthew J Douglass Patricia C Fanning Lynne Goldstein Simon J Holdaway Kathryn A Kamp Sam Lin Emilia Oddo Zeljko Rezek Julien Riel Salvatore Gary O Rollefson Jeffrey Rosenthal Barbara J Roth Sissel Schroeder Justin I Shiner John C Whittaker David R Wilcox

Neanderthals in the Levant Donald O. Henry, 2003-10-01 The volume traces the controversy that revolves around the bio cultural relationships of Archaic Neanderthal and Modern humans at global and regional Levantine scales The focus of the book is on understanding the degree to which the behavioral organization of Archaic groups differed from Moderns To this end a case study is presented for a 44 70 000 year old Middle Paleolithic occupation of a Jordanian rockshelter The research centering on the spatial analysis of artifacts hearths and related data reveals how the Archaic occupants of the shelter structured their activities and placed certain conceptual labels on different parts of the site The structure of Tor Faraj is compared to site structures defined for modern foragers in both ethnographic and archaeological contexts to measure any differences in behavioral organization The comparisons show very similar structures for Tor Faraj and its modern cohorts

The implications of this finding challenge prevailing views in the emergence of modern human controversy in which Archaic groups are thought to have had inferior cognition and less complex behavioral social organization than modern foragers And it is generally thought that such behaviors only emerged after the appearance of the Upper Paleolithic dated some 10 20 000 years later than the occupation of Tor Faraj The Oxford Handbook of Cognitive Archaeology Thomas Wynn,Karenleigh Overmann,Frederick Coolidge,2024-03-27 The Oxford Handbook of Cognitive Archaeology is a landmark publication showcasing the theories methods and accomplishments of archaeologists who investigate the human mind including its evolutionary development its ideation thoughts and beliefs and its very nature through material forms The volume encompasses the wide spectrum of the discipline showcasing contributions from more than 50 established and emerging scholars from Europe Africa Asia Australia and the Americas Prominent among these are contributions that discuss the epistemological frameworks of both the evolutionary and ideational approaches and the leading theories that groundinterpretations Significantly the majority of chapters deliver substantive contributions that analyze specific examples of material culture from the oldest known stone tools to ceramic and rock art traditions of the recent millennium These examples include the gamut of methods and techniques including typology replication studies cha nes operatoires neuroarchaeology ethnographic comparison and the direct historical approach **PaleoAmerican Archaeology in Virginia** Wm Jack Hranicky,2017-10-10 This book is a full color study of over 500 pre Clovis stone artifacts of Virginia With the 22K year date of the Cinmar bipoint in Virginia there is ample evidence of artifact classes that are older than Clovis Over 50 tool types are illustrated and discussed Artifact single site collections are documented The book argues the differences between Holocene biface technology with the blade and core technology of the Pleistocene era The requirements for identifying Pleistocene artifacts is presented such as platforms remaining cortex and invasive retouch They are presented in a tool model Major stones namely jasper are discussed as a lithic determinism The east coast distribution is presented for various tool types Additionally as a major focus cross Atlantic flake blade identical tools from Europe are illustrated with Middle Atlantic artifacts Artifact ergonomics such as right left handed tools hypothetical tool center are argued Structural and functional axis are shown and described on how to identify them on tools Overall this book presents an initiating view of the archaeology needed to study Pleistocene era artifacts on the American east coast Images, Perceptions and Productions in and of Antiquity Maria Helena Trindade Lopes,André Patrício,2023-01-06 This book provides access to new and exclusive research in several Antiquity and Antiquity related fields and subjects Revolving around four general subjects Ancient Egypt the Ancient Near and Middle East the Classical World and the Reception of Antiquity it will provide access to new works spanning from archaeology literature art reception studies among others allowing the reader to gain insights into some of the most current subjects of investigation in modern academia
