

000000 Lab 5: Assessment Questions

Create a CERT Response Plan for a Typical IT Infrastructure

Student Name: _____ Anthony Nguyen _____

Answer

This task and integration strategy requires building and implementing a CERT response plan. This strategy is preparing for potential cybersecurity incidents and preventing them by applying threat modeling.

Like any kind of methodology, this model will not plan, prepare, and practice, the model prepared just can be useful in any case scenario. This is a preparedness to apply the cybersecurity incident response methodology to handling incidents specific to a portion of the network infrastructure.

Lab Assessment Questions

1. What are incident response capabilities or security measurements for your organization for this portion of the network? Describe how your CERT response plan supports your system.

Many systems up to date hardware better patches and updates have security to check logs and vulnerabilities from existing security vulnerabilities. Suitable Response Response Network will filter traffic to ensure that connected traffic does not reach vulnerable systems.

2. How does a CERT practice an organization respond?

3. Describe an organization's response for incidents. Without prepared, the organization is able to respond to the incidents threat system and with focused effort.

4. How does a CERT response plan help respond to?

5. How does the incident response plan help with the incident response?
