

## MLC VS ISM

MLC 2006	ISM Code version 2013
Established in 2006 Entry in force 2013/14	Established in 92 but final implementation in 2002
<b>Policy and health/safety at work programme including risk assessment and the corresponding training of the seafarers: Reg 4.3</b>	The safety and environmental protection policy is the base of the code. The evaluation of the risks assessment and "safe working environment" are objectives only. As the ISM code remains vague on the corresponding training required, it was necessary to issue IMO circulars CMI to specify the necessary training of CPA and crews.
<b>"Reasonable" precautions to prevent industrial accidents, wounds and occupational diseases on board and in a non mandatory part B 4.3: Taking into account of ILO guidelines (16) on the prevention of the accidents on board ships at sea or in port.</b>	The ISM code is very general on this and requires only the insurance of application of mandatory rules and regulations (international or national) and taking into account the other existing recommendations concerning, inter alia, the prevention of the accidents and the possible diseases due to the carriage and handling of dangerous goods for example.
<b>Onboard program for prevention with the participation of the crew These crewmembers can be elected or named at the ship's health and safety committee of the ship. Other interested people of the crew can apply to be part of it</b>	The code being voluntarily general, it can be so precise that a circular or resolution is not necessary. The entry in force of MLC 2006 prevented that this aspect of the seafarers participation entered in ISM code amendments 2014
