## **It Aint Necessarily So:**

**"It Aint Necessarily So" Book One** Bob Maddison, 2013-11-13 Discovering what is real or not real can be difficult This Book One starts with the true nature of the universe From the very basic Fabric of the Universe then to following nature or all things and that includes what is commonly known as God or gods Following that we deal with human origins evolution alternatives then discover our true nature and problems with religions Reclaiming our individual value in life is critically covered Human s lost prehistory is looked as a prelude to later books A mountain of lies and cover ups are revealed This book covers many original writings by Bob Maddison plus many items of interest compiled from research Sufficient evidence is included in all cases so that you the critical reader is not faced with my assertions only but can do your independent research

**"It Ain't Necessarily So" Book Two** Bob Maddison, 2013-11-12 A review of global conspiracy against mankind from religion science education wars government medicines to global warming Now is the time to uncover and discover some of the many issues and causes of human misery and despair Also covered is the origin of religions foisted upon man and how and why this is done The truth about the identity of Jehovah Yahweh culminating in the Christian god and christ is fully documented

**The Atomic World Spooky? It Ain't Necessarily So!** Theo van Holten, 2016-12-09 The present book takes the discovery that quantum like behaviour is not solely reserved to atomic particles one step further If electrons are modelled as vibrating droplets instead of the usually assumed point objects and if the classical laws of nature are applied then exactly the same behaviour as in quantum theory is found quantitatively correct The world of atoms is strange and quantum mechanics the theory of this world is almost magic Or is it Tiny droplets of oil bouncing round on a fluid surface can also mimic the world of quantum mechanics For the layman for whom the main part of this book is written this is good news If the everyday laws of nature can conspire to show up quantum like phenomena there is hope to form mental pictures how the atomic world works The book is almost formula free and explains everything by using many sketches and diagrams The mathematical derivations underlying the main text are kept separate in a peer reviewed appendix The author a retired professor of Flight Mechanics and Propulsion at the Delft University of Technology chose to publish his findings in this mixed popular and scientific form because he found that interested laymen more often than professional physicists feel the need to form visualisations of quantum phenomena

**It Ain't Necessarily So - When Scripture and Tradition Collide** Dale Austin, 2017-05-10 A line from the song It Ain't Necessarily So from the Gershwin brothers play Porgy and Bess tells us that the things that you're liable to read in the Bible it ain't necessarily so While we would like to take issue with that comment this book of the same title as the song explores the validity of such a seemingly heretical statement But it isn't what we read so much as how we interpret those words that ain't necessarily so While the words are accurate sometimes our understanding can be a bit off track In this work Pastor Austin challenges the reader to explore the relationship between Scripture and Tradition in our lives and in our faith formation Much of what we claim to believe about the Scriptures is

actually based more on our Traditions than we wish to acknowledge We have been taught by previous generations what the Scriptures are saying to us This becomes a significant part of our individual Tradition the sum total of what we believe the Scriptures to say and how they compel us to act Because we trust those ancestors not to lead us astray we don't question this Tradition Perhaps we should One of the primary assertions of this work is that Tradition trumps Truth We don't intend for it to be so but often what we think we are reading in the Scriptures is tainted by years of Tradition and the teaching of the Church We don't question what we've been taught it is the Truth Sometimes however that truth is slightly skewed by our life experiences and teachings When this happens Scripture often yields to our own Tradition without our awareness that this is happening This book explores the possibility that when Tradition trumps Truth there might be more than one way of understanding the Scriptures particularly when we recognize how our truth has been compromised by years of tradition and practice This is not to say that we have been wrong for all of these years But these chapters are written in the hopes of spurring further discussion into the many layers in which the Scriptures are given to us and perhaps lead us to gaining new insights and appreciation for the depths of our faith not to replace our previous convictions unless necessary but to augment them

**It Ain't Necessarily So** David Murray, Joel B. Schwartz, S. Robert Lichter, 2001 We all know the old adage You can't believe everything you read So why do we panic the minute The American Something or the Blah Blah Institute releases a new study proving that millions of Americans will die next year from inhalation of a gas none of us can even pronounce

**It Ain't Necessarily So** Richard Lewontin, 2001-09-30 Is our nature as individuals as a species determined by our evolution and encoded in our genes If we unravel the protein sequences of our DNA will we gain the power to cure all of our physiological and psychological afflictions and even to solve the problems of our society Today biologists especially geneticists are proposing answers to questions that have long been asked by philosophy or faith or the social sciences Their work carries the weight of scientific authority and attracts widespread public attention but it is often based on what the renowned evolutionary biologist Richard Lewontin identifies as a highly reductive misconception the pervasive error that confuses the genetic state of an organism with its total physical and psychic nature as a human being In these nine essays covering the history of modern biology from Darwin to Dolly the sheep all of which were originally published in The New York Review of Books Lewontin combines sharp criticisms of overreaching scientific claims with lucid expositions of the exact state of current scientific knowledge not only what we do know but what we don't and maybe won't anytime soon Among the subjects he discusses are heredity and natural selection evolutionary psychology and altruism nineteenth century naturalist novels sex surveys cloning and the Human Genome Project In each case he casts an ever vigilant and deflationary eye on the temptation to look to biology for explanations of everything we want to know about our physical mental and social lives These essays several of them updated with epilogues that take account of scientific developments since they were first written are an indispensable guide to the most controversial issues in the life sciences today The second edition of this collection includes

new essays on genetically modified food and the completion of the Human Genome Project It is an indispensable guide to the most controversial issues in the life sciences today *New York Court of Appeals. Records and Briefs.* New York (State).,

**The Phi Delta Epsilon News** ,1942 *Only Say the Word* Alan McManus,2012-11-30 Many good people in good faith while sympathising with the ethical and ecclesiastical situation of lesbian and gay Christians still regard homosexuality as unnatural Other good people in just as good faith defend homosexuality on grounds of personal plight and involuntary sexual orientation with private misgivings that this defence may also be applied to paedophilia This little book provides not only a useful argument for a more merciful reading of Scripture than that usually employed to condemn same sex relationships but also a philosophical analysis of the nature of nature Finding that all and only those relationships which are harmonious can be considered natural the author invites us to only say the Word that we may all be healed A former Franciscan friar Dr Alan McManus wrote his doctoral thesis *Alchemy at the Chalkface* Pirsig Pedagogy and the Metaphysics of Quality at the University of Glasgow Holding degrees in Church History Practical Theology and Religious Studies he has taught EFL at home and abroad Spanish Italian to adults and Religious Moral Philosophical Studies in comprehensive schools in Scotland He has published articles on political philosophy and WW1 remembrance in the online journal *Citizenship Social and Economics Education* He is a member of Affirmation Scotland *Darwin Loves You* George Levine,2008-03-30 Without minimising or sentimentalising the harsh qualities of life governed by natural selection and without deifying Darwin this text makes a moving case for an enchanted secularism a commitment to the value of the natural world and the human striving to understand it **As If By Design** Edward A. Wasserman,2021-07-22 The eureka moment is a myth It is an altogether naive and fanciful account of human progress Innovations emerge from a much less mysterious combination of historical circumstantial and accidental influences This book explores the origin and evolution of several important behavioral innovations including the high five the Heimlich maneuver the butterfly stroke the moonwalk and the Iowa caucus Such creations striking suitability to the situation and the moment appear ingeniously designed with foresight However more often than not they actually arise as if by design Based on investigations into the histories of a wide range of innovations Edward A Wasserman reveals the nature of behavioral creativity What surfaces is a fascinating web of causation involving three main factors context consequence and coincidence Focusing on the process rather than the product of innovation elevates behavior to the very center of the creative human endeavor **O JERUSALEM** R. P. Hanna,2023-07-18 O Jerusalem offers adventure travel and mystery This modern fiction depicts its characters minds It expresses the anger that most people feel with extremism The story begins soon after the 9 11 bombings Christians Jews Muslims atheists and anarchists all risk destroying themselves and each other Fanatics almost cause an apocalypse Fake news deludes everyone In London Jack is a fanatical atheist seen through the eyes of his moderate girlfriend Emma whose uncle is the Archbishop of Canterbury In New York Chaim is a Jewish extremist observed by graduate student Helen and her Professor In Istanbul Sheikh Abu who directs
