flower and host diverse forest life In this short book treetop explorer Meg Lowman guides us through a global forest Each chapter of *Tree Day* introduces a single tree during a single hour highlighting twenty four species from around the world In the dark of Yemen's night it is too early to see the red sap from which the dragon's blood tree gets its name But if we watch closely we will see nocturnal geckos carry the tree's pollen in their snouts Later in the Pacific Northwest we climb the world's

tallest species the coastal redwood The morning fog is a reminder that redwoods absorb water through their roots and canopies helping them survive such heights The sun is already low in the sky on an autumn afternoon Given the darkness of this New England forest the sugar maple s leaves have stopped producing chlorophyll that converts light into energy and green gives way to vivid crimson foliage After many hours of boiling the maple sap makes delicious maple syrup As the sun sets in Mexico we observe the origin of another treat chocolate The cocoa tree s flowers sprout along its trunk and branches allowing easy access for tiny insects like midges that pollinate the tree and start the process of making delicious food for humans monkeys bats and squirrels By the end of our tree day we will understand that trees are the silent caretakers of our planet providing us with medicines foods machinery for making fresh water and oxygen and more For each hour celebrated artist Thibaud Hermès has depicted these trees with gorgeous pen and ink illustrations Working together to narrate and illustrate these unique moments in time Lowman and Hermès have created an engaging read that is a perfect way to spend an hour or two and a true gift for anyone who has ever looked up at a tree in wonder *Territory* David Gissen,2010-05-24 Advancing relationships between architecture and nature this work emphasises the simultaneous production of architectural objects and their surrounding environment It enables the various geographical patterns effects and sensations within architectural and urban experience It features contributions from geographers historians and theorists Rainforest Tourism, Conservation and Management Bruce Prideaux,2014-09-19 Globally rainforests are under threat on numerous fronts including clearing for agriculture harvesting for timber and urban expansion Yet they have a crucial role in biodiversity conservation climate change mitigation and providing other ecosystem services As the term is used in this book rainforests include both temperate and tropical although the emphasis is on tropical rainforests Rainforests are also attractive tourist spaces and where they have been used as a tourism resource have generated significant income for local communities However not all use of rainforests as a tourism resource has been sustainable This book argues that sustainability must be the foundation on which tourism use of this complex but ultimately fragile ecosystem must be built upon It provides a multi disciplinary perspective incorporating rainforest science management and tourism issues The book is organized into four sections commencing with Rainforest Ecology and Management followed by People and Rainforests Opportunities for Rainforest Tourism Development and finally Threats to Rainforests Each major rainforest region is covered including the Amazon Central America Africa Australia and south east Asia in the context of a specific issue For example rainforests in Papua New Guinea are examined in the context of community based ecotourism development while the rainforests in Borneo are discussed in an examination of wildlife issues Other issues covered in this manner include governance empowerment issues for rainforest peoples and climate change It's a Jungle Up There Margaret D.
