What is Criminology? Mary Bosworth, Carolyn Hoyle, 2012-05-31 Criminology is a booming discipline yet one which can appear divided and fractious In this rich and diverse collection of 34 essays some of the world's leading criminologists respond to a series of questions designed to investigate the state impact and future challenges of the discipline What is criminology for What is the impact of criminology How should criminology be done What are the key issues and debates in criminology today What challenges does the discipline of criminology face How has criminology as a discipline changed over the last few decades The resulting essays identify a series of intellectual methodological and ideological borders Borders in criminology as elsewhere are policed yet they are also frequently transgressed criminologists can and do move across them to plunder admire or learn from other regions While some boundaries may be more difficult or dangerous to cross than others it is rare to find an entirely secluded locale or community In traversing ideological political geographical and disciplinary borders criminologists bring training

tools and concepts as well as key texts to share with foreigners From such exchanges over time borders may break down shift or spring up enriching those who take the journey and those who are visited It is in other words in criminologys capacity for and commitment to reflexivity on which the strength of the field depends **Advances in Evidence-Based Policing**

Johannes Knutsson,Lisa Tompson,2017-04-21 The evidence based policing EBP movement has intensified in many countries around the world in recent years resulting in a proliferation of policies and infrastructure to support such a transformation This movement has come to be associated with particular methods of evaluation and systematic review which have been drawn from what is assumed to prevail in medicine Given the credibility EBP is currently enjoying with both practitioners and government it is timely to subject its underpinning logic to thoughtful scrutiny This involves deliberating upon the meaning of evidence and what different models of knowledge accumulation and research methods have to offer in realising the aims of EBP The communication and presentation of evidence to practitioner audiences is another important aspect of EBP as are collaborative efforts to co produce new knowledge on police practice This is the first book that takes a kaleidoscopic approach to depict what EBP presently is and how it could develop The chapters individually and collectively challenge the underlying logic to the mainstream EBP position and the book concludes with an agenda for a more inclusive conceptualisation of evidence and EBP for the future It is aimed at students and academics who are interested in being part of this movement as well as policymakers and practitioners interested in integrating EBP principles into their practices
