Multiple Paths of Midlife Development Margie E. Lachman, Jacquelyn Boone James, 1997-05-15 In this collection of fifteen papers leading researchers analyze the middle years of the lifespan paying close attention to the many different facets of adult development They study the various changes involving the self and others that middle aged adults experience in the realms of work family and health This book explains how the different experiences interrelate and how a better understanding of them can foster successful midlife development

Midlife Development in the United States (MIDUS), 2004 This survey of adult management tasks was part of a larger national project to investigate the patterns predictors and consequences of midlife development in the areas of physical health psychological well being and social responsibility Conducted in Boston the survey was designed to examine how adults manage tasks in three domains of life work family and health Further goals were to describe the subjective experience of goal attainment in midlife and to link it with objective measures of short term longitudinal changes and cognitive functioning During the national study the Boston area was intentionally oversampled in order to create a subset to be used for in depth study of management processes in midlife The Boston study began six months after the national study and consisted of three interviews a 30 minute phone interview followed by a 20 minute mail questionnaire Time 1 a 90 minute in person combination of cognitive tests cortisol testing photograph taking and interview Time 2 and a 30 minute phone interview Time 3 conducted at six month intervals The focus was on projects related to family work and health that participants were working on during the period of the study Each successive interview investigated participants assessments of their progress in the present recollection of six months in the past and prediction six months into the future At Time 1 participants generated a list of two important family work and health tasks then chose one of each as the most important in that domain For each of the most important tasks questions were asked about deadlines whether participants were doing tasks because they had to do them felt that they should do them or chose to do them and whether participants were doing tasks for themselves others or both All six projects were ranked according to importance and participants Cf <http://webapp.icpsr.umich.edu/cocoon/ICPSR/STUDY/03596.xml>

Middle Adulthood Sherry L. Willis, Mike Martin, 2005-06-23 This book is unique because of the focus on longitudinal studies and international perspectives There is no other book like it This book will be useful both as an advanced undergraduate or graduate course text and as a resource for scholars Rosemary Blieszner Virginia Polytechnic Institute and State University A very strong volume This book will clearly be a must have for scholars interested in midlife Michael Marsiske University of Florida Midlife is no longer an uncharted territory in human development A group of outstanding researchers from different countries focuses on this peak period in the life span Various views including historical cultural and socio structural perspectives are adopted Comprehensive reviews of studies on almost all relevant domains of human development are given and provide a colorful picture of what midlife in these days may be all about Sigrun Heide Filipp University of Trier Germany

Middle adulthood is a critical period of the life course. How we develop in middle age, the central period of our lives, can influence how well we cope in our later years. *Middle Adulthood: A Lifespan Perspective* explores these issues by bringing together a distinguished group of international contributors associated with a range of prestigious longitudinal studies. Key Features: Presents a much needed longitudinal lifespan perspective on middle age; Provides a multicultural perspective to determine universal normative patterns of midlife development; Addresses a broad scope of topics including historical perspectives on the emergence of middle age as a normative developmental period in the life course; change and stability in personality and cognitive development and decline. *Middle Adulthood* is designed for scholars, researchers, and practitioners in the field of adult development and aging. It is an excellent text for advanced undergraduate and graduate students studying midlife development in the departments of Developmental Psychology, Human Development and Family Studies, Gerontology, Family Diversity, and Health.

Life in the Middle Sherry L. Willis, James B. Reid, 1998-11-03. There is a growing body of scientific knowledge regarding development during the middle years, which has so far been relegated to discipline specific texts and journals, e.g., clinical psychology and endocrinology. *Life in the Middle* consolidates main findings across disciplines with a life span perspective regarding mid life. Coverage includes individual development in middle age from the psychological and biological perspectives as well as the sociocultural context in which middle aged individuals live and work, including physical health in mid life, psychological well being, cognitive development, the impact of work on the individual, and the general development of the self. This age period is increasingly becoming the focus of scholarly attention as the largest cohort in U.S. history are now moving into the middle years, e.g., the baby boomers. From 1990 to 2015, the number of middle aged people will increase 72 percent from 47 to 80 million. Contributors are outstanding scholars in the field of adult development. Addresses critical theoretical issues in midlife. Includes important contributions to our understanding of physical health at midlife. Presents a thorough review of women's health at midlife. Takes a holistic approach to biopsychosocial functioning at midlife.

How Healthy Are We? Orville Gilbert Brim, Carol D. Ryff, Ronald C. Kessler, 2004-01-15. Childhood, adolescence, even the twilight years have been extensively researched and documented. But the vast terrain known as midlife, the longest segment of the life course, has remained uncharted. How physically and psychologically healthy are Americans at midlife? And why do some experience greater well being than others? The MacArthur Foundation addressed these questions head on by funding a landmark study known as *Midlife in the U.S.* or MIDUS. For the first time in a single study, researchers were able to integrate epidemiological, sociological, and psychological assessments as well as innovative new measures to evaluate how work and family life influence each other. *How Healthy Are We?* presents the key findings from the survey in three sections: physical health, quality of life, and psychological well being, and the contexts: family, work, of the midlife. The topics covered by almost forty scholars in a wide variety of fields are vast, including everything from how health and well being vary with socioeconomic standing, gender, race, or region of the country, to how middle aged

people differ from younger or older adults in their emotional experience and quality of life This health the study measures not only health the absence of illness but also reports on the presence of wellness in middle aged Americans The culmination of a decade and a half of research by leading scholars How Healthy Are We will dramatically alter the way we think about health in middle age and the factors that influence it Researchers policymakers and others concerned about the quality of midlife in contemporary America will welcome its insights Having a good life means having good relationships with others to almost 70% of those surveyed Less than 40% mentioned their careers Reports of disruptive daily stressors vary by age with young adults and those in midlife experiencing more than those in later adulthood Men have higher assessments of their physical and mental health than woman until the age of 60 **Early and Middle Adulthood** Lillian E. Troll,1985 **MIDDLE ADULTHOOD.** ,2002
