Handbook Of Multibiometrics International Series On Biometrics:

Multibiometrics for Human Identification Bir Bhanu, Venu Govindaraju, 2011-04-29 In today's security conscious society real world applications for authentication or identification require a highly accurate system for recognizing individual humans. The required level of performance cannot be achieved through the use of a single biometric such as face, fingerprint, ear, iris, palm, gait, or speech. Fusing multiple biometrics enables the indexing of large databases, more robust performance, and enhanced coverage of populations. Multiple biometrics are also naturally more robust against attacks than single biometrics. This book addresses a broad spectrum of research issues on multibiometrics for human identification, ranging from sensing modes and modalities to fusion of biometric samples and combination of algorithms. It covers publicly available multibiometrics databases, theoretical and empirical studies on sensor fusion techniques in the context of biometrics authentication, identification, and performance evaluation, and prediction. **Handbook of Multibiometrics** Arun A.

Ross, Karthik Nandakumar, Anil K. Jain, 2006-08-11 Details multimodal biometrics and its exceptional utility for increasingly reliable human recognition systems. Reveals the substantial advantages of multimodal systems over conventional identification methods. *Handbook of Face Recognition* Stan Z. Li, Anil K. Jain, 2011-08-22 This highly anticipated new edition provides a comprehensive account of face recognition research and technology spanning the full range of topics needed for designing operational face recognition systems. After a thorough introductory chapter, each of the following chapters focuses on a specific topic, reviewing background information, up-to-date techniques, and recent results, as well as offering challenges and future directions. Features fully updated, revised, and expanded, covering the entire spectrum of concepts, methods, and algorithms for automated face detection and recognition systems. Provides comprehensive coverage of face detection, tracking, alignment, feature extraction, and recognition technologies and issues in evaluation systems, security, and applications. Contains numerous step-by-step algorithms, describes a broad range of applications, presents contributions from an international selection of experts, integrates numerous supporting graphs, tables, charts, and performance data.

Advances in Biometrics Massimo Tistarelli, Mark S. Nixon, 2009-05-25 This book constitutes the refereed proceedings of the Third International Conference on Biometrics (ICB 2009) held in Alghero, Italy, June 2-5, 2009. The 36 revised full papers and 93 revised poster papers presented were carefully reviewed and selected from 250 submissions. Biometric criteria covered by the papers are assigned to face, speech, fingerprint, and palmprint, multibiometrics, and security, gait, iris, and other biometrics. In addition, there are 4 papers on challenges and competitions that currently are under way, thus presenting an overview on the evaluation of biometrics. **Handbook of Biometrics** Anil K. Jain, Patrick Flynn, Arun A. Ross, 2007-10-23 Biometrics is a rapidly evolving field with applications ranging from accessing one's computer to gaining entry into a country. The deployment of large-scale biometric systems in both commercial and government applications has increased public awareness of this technology. Recent years have seen significant growth in biometric research, resulting in the development of

innovative sensors new algorithms enhanced test methodologies and novel applications This book addresses this void by inviting some of the prominent researchers in Biometrics to contribute chapters describing the fundamentals as well as the latest innovations in their respective areas of expertise *Biometric ID Management and Multimodal Communication* Julian Fierrez,Javier Ortega-Garcia,Anna Esposito,Andrzej Drygajlo,Marcos Faundez-Zanuy,2009-09-29 This book constitutes the research papers presented at the Joint 2101 2102 International Conference on Biometric ID Management and Multimodal Communication BioID_MultiComm 09 is a joint International Conference organized cooperatively by COST Actions 2101 2102 COST 2101 Action is focused on Biometrics for Identity Documents and Smart Cards BIDS while COST 2102 Action is entitled Cross Modal Analysis of Verbal and Non verbal Communication The aim of COST 2101 is to investigate novel technologies for unsupervised multimodal biometric authentication systems using a new generation of biometrics enabled identity documents and smart cards COST 2102 is devoted to develop an advanced acoustical perceptual and psychological analysis of verbal and non verbal communication signals originating in spontaneous face to face interaction in order to identify algorithms and automatic procedures capable of recognizing human emotional states **International Conference on Advanced Computing Networking and Informatics** Raj Kamal,Michael Henshaw,Pramod S. Nair,2018-11-27 The book comprises selected papers presented at the International Conference on Advanced Computing Networking and Informatics ICANI 2018 organized by Medi Caps University India It includes novel and original research work on advanced computing networking and informatics and discusses a wide variety of industrial engineering and scientific applications of the emerging techniques in the field of computing and networking *Touchless Fingerprint Biometrics* Ruggero Donida Labati,Vincenzo Piuri,Fabio Scotti,2015-08-14 This book offers the first comprehensive analysis of touchless fingerprint recognition technologies It gives an overview of the state of the art describes relevant industrial applications and presents new techniques to efficiently and effectively implement advanced solutions based on touchless fingerprint biometrics It considers current problems in developing high accuracy touchless recognition technology and recommends future work that can be done to address them A state of the art presentation of the field it demonstrates that applying touchless technologies to biometric recognition systems shows particular promise **Advanced Topics in Biometrics** Haizhou Li,Liyuan Li,Kar-Ann Toh,2014-05-14 Biometrics is the study of methods for uniquely recognizing humans based on one or more intrinsic physical or behavioral traits After decades of research activities biometrics as a recognized scientific discipline has advanced considerably both in practical technology and theoretical discovery to meet the increasing need of biometric deployments In this book the editors provide both a concise and accessible introduction to the field as well as a detailed coverage on the unique research problems with their solutions in a wide spectrum of biometrics research ranging from voice face fingerprint iris handwriting human behavior to multimodal biometrics The contributions also present the pioneering efforts and state of the art results with special focus on practical issues concerning system development This book is a valuable reference for established
