Summing up RECOMMENDED Upper division undergraduates through professionals technical program students U Greife Colorado School of Mines USA I found the biographical accounts of the various stalwarts of Physics inspirational Most of them if not all had to overcome economic hardships or personal tragedies or had to do their groundbreaking work in the face of tyranny and war The biographies also highlighted the high standards of moral convictions that the scientists had as they realized the grave implications of some of their work and the potential threats to humanity This ought to inspire and motivate young men and women aspiring to be

physicists Even people who have been in the field for a while should find your book re energizing It certainly had that effect on me Dr Ramkumar Venkataraman Canberra Industries Inc Meriden CT USA Winner of an Honorable Mention in the 2017 PROSE Awards in the category of Chemistry and Physics <https://proseawards.com/winners/2017-award-winners/> Includes new content that explains the vital benefits that nuclear technology provides and the need to be aware and involved in worldwide efforts toward the reduction of nuclear weapon stockpiles and the elimination of the threat of nuclear weapons Provides context and insights on key research over the past three centuries placing radioactivity in real world contexts Supports learning via multiple solved problems that answer practical questions concerning nuclear decay nuclear radiation and the interaction of nuclear radiation with matter [Handbook on Radiation Probing, Gauging, Imaging and Analysis](#) E.M. Hussein, 2006-05-05 The need for this book arose from my teaching engineering and search experience in the non power aspects of nuclear technology The lack of a comprehensive textbook in industrial applications of radiation frustrated my students who had to resort to a multitude of textbooks and research publications to familiarize themselves with the fundamental and practical aspects of radiation technology As an engineer I had to acquire the design aspects of radiation devices by trial and error and often by accidental reading of a precious publication As a researcher and a supervisor of graduate students I found that the needed literature was either hard to find or too scattered and diverse More than once I discovered that what appeared to be an exciting new idea was an old concept that was tried a few decades earlier during the golden era of Atom for Peace I am hoping therefore that this book will serve as a single comprehensive reference source in a growing field that I expect will continue to expand This book is directed to both neophytes and experts and is written to combine the old and the new the basic and the advanced the simple and the complex It is anticipated that this book will be of help in living older concepts improving and expanding existing techniques and promoting the development of new ones

Lippens,J.-C. Jumas,J.-M.R. Génin,2010-04-15 Since January 2004 Mossbauer spectrometers 1 have been making measurements on Mars as a component of the Athena instrument suite because the technique can yield information about early Martian environmental conditions and can help in identifying minerals formed in hot watery environments that could preserve fossil evidence of Martian life from an early Athena web site cf 2 The spectrometers are mounted on the instrument deployment armsoftwo Mars Exploration Rovers MER A Spirit and MER B Opportunity where they have access to a wide range of rocks and soils Initial measurements at the Spirit site showed that surface samples contained primarily basaltic minerals with weathering by physical processes 3 while mineralogy inferred from data acquired at the Opportunity site provided evidence for past aqueous processes 4 More recently Mossbauer spectroscopy has identified goethite at Columbia Hills 5 and contributed to an

understanding of the nature of Martian atmospheric dust and its implications for the history of water on Mars 6 It is important that MER team results be verified and expanded upon Since August 2004 Mars Mossbauer and related data with supporting documentation have been made available to the science community via the Planetary Data System PDS at the MER Analyst s Notebook download site <http://www.anserver1.eprsl.wustl.edu> and at the PDS Geosciences Node <http://www.pds.geosciences.wustl.edu>
