Nanofabrication Using Focused Ion and Electron Beams Ivo Utke, Stanislav Moshkalev, Phillip Russell, 2012-05-01 This book comprehensively reviews the achievements and potentials of a minimally invasive three dimensional and maskless surface structuring technique operating at nanometer scale by using the interaction of focused ion and electron beams FIB FEB with surfaces and injected molecules Measurement and Control of Charged Particle Beams Michiko G. Minty, Frank Zimmermann, 2013-03-09 The intent of this book is to bridge the link between experimental observations and theoretical principles in accelerator physics The methods and concepts taken primarily from high energy accelerators have for the most part already been presented in internal reports and proceedings of accelerator conferences a portion of which has appeared in refereed journals In this book we have tried to coherently organize this material so as to be useful to designers and operators in the commissioning and operation of particle accelerators A point of emphasis has been to provide wherever possible experimental data to illustrate the particular concept under discussion Of the data presented most are collected from presently existing or past accelerators and we regret the problem of providing original data some of which appear in
