to date scholarship and intellectual accessibility Born to Wonder Alister McGrath, 2020-08-04 In *Born to Wonder* Alister McGrath a prolific Oxford scholar scientist and theologian explores the deepest mystery at the heart of life itself Life is a gift We never asked to be born Yet here we are living in this strange world of space and time trying to work out what it's all about before the darkness closes in and extinguishes us We are adrift on a misty grey sea of ignorance seeking a sun kissed island of certainty on which we might hope to find clear answers to our deepest and most poignant questions What is the point of life Why are we here And what is it about us that makes us want to ask these questions As far as we know we're the only species on earth that asks these questions and dares to hope that we might find an answer It seems that we are born to wonder not merely to exist From time to time all of us find ourselves overwhelmed by a sense of awe or mystery often when confronted with the beauty of nature whether it is a mountain stream or the vast expanse of ocean waters That is when we see a flicker of a grander vision of reality perhaps lying beyond the horizons of our experience It is as if for only a moment a veil is removed and we catch a half glimpsed sight of a promised land waiting to be mapped and explored This sense of wonder fuels much of humanity's creativity and its search for understanding **Terror Management Theory** Robert B. Arrowood, Cathy R. Cox, 2020-03-09 In *Terror Management Theory A Practical Review of Research and Application* Robert B Arrowood and Cathy R Cox discuss relevant research from an experimental existential psychology tradition Outlining the past thirty years of research within terror management the authors discuss such topics as religion close relations politics and law existential growth and physical and mental health Although the inevitable outcome of all humanity is death according to terror management theory we adhere to cultural worldviews and establish close relations in order to boost our self esteem Through these defences we deny our death and attain a degree of immortality staving off existential fear by being part of an enduring cultural system that will outlive any individual member **Assessing Spirituality in a Diverse World** Amy L. Todd Billings, 2020-09-15 We're all going to die Yet in our medically advanced technological age many of us see death as a distant reality something that happens only at the end of a long life or to other people In The End of the Christian Life Todd Billings urges Christians to resist that view Instead he calls us to embrace our mortality in our daily life and faith This is the journey of genuine discipleship Billings says following the crucified and resurrected Lord in a world of distraction and false hopes Drawing on his experience as a professor and father living with incurable cancer Billings offers a personal yet deeply theological account of the gospel's expansive hope for small mortal creatures Artfully weaving rich theology with powerful narrative Billings writes for church leaders and laypeople alike Whether we are young or old reeling from loss or clinging to our own prosperity this book challenges us to walk a strange but wondrous path in the midst of joy and lament to receive mortal limits as a gift an opportunity to give ourselves over to the Lord of life *Psychology in Historical Context* Richard

Gross, 2017-07-06 Psychology the study of mind and behaviour has developed as a unique discipline in its brief history Whether as it currently takes place or how it has been conducted over the past 140 years or so since it became recognized as a separate field of study there has been constant debate on its identity as a science Psychology in Historical Context Theories and Debates examines this debate by tracing the emergence of Psychology from parent disciplines such as philosophy and physiology and analyzes key topics such as the nature of science itself a much misunderstood human activity often equated with natural science the nature of the scientific method and the relationship between data gathering and generalization the nature of certainty and objectivity and their relevance to understanding the kind of scientific discipline Psychology is today This engaging overview written by renowned author Richard Gross is an accessible account of the main conceptual themes
