National Intelligence Systems Gregory F. Treverton, Wilhelm Agrell, 2009-06-22 A series of investigations especially in Great Britain and the United States have focused attention on the performance of national intelligence services At the same time terrorism and a broad span of trans national security challenges has highlighted the crucial role of intelligence This book takes stock of the underlying intellectual sub structure of intelligence For intelligence as for other areas of policy serious intellectual inquiry is the basis for improving the performance of real world institutions The volume explores intelligence from an intellectual perspective not an organizational one Instead the book identifies themes that run through these applications such as the lack of comprehensive theories the unclear relations between providers and users of

intelligence and the predominance of bureaucratic organizations driven by collection. A key element is the development or rather non development of intelligence toward an established set of methods and standards and above all an ongoing scientific discourse.

Field Evaluation in the Intelligence and Counterintelligence Context National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Planning Committee on Field Evaluation of Behavioral and Cognitive Sciences-Based Methods and Tools for Intelligence and Counterintelligence, 2010-04-16. On September 22-23, 2009, the National Research Council held a workshop on the field evaluation of behavioral and cognitive sciences based methods and tools for use in the areas of intelligence and counterintelligence. Broadly speaking, the purpose of the workshop was to discuss the best ways to take methods and tools from behavioral science and apply them to work in intelligence operations. More specifically, the workshop focused on the issue of field evaluation: the testing of these methods and tools in the context in which they will be used in order to determine if they are effective in real world settings. This book is a summary and synthesis of the two days of presentations and discussions that took place during the workshop. The workshop participants included invited speakers and experts from a number of areas related to the behavioral sciences and the intelligence community. The discussions covered such ground as the obstacles to field evaluation of behavioral science tools and methods, the importance of field evaluation and various lessons learned from experience with field evaluation in other areas.

Cognitive Bias in Intelligence Analysis Whitesmith Martha, 2020-09-21. Tests whether the analysis of competing hypotheses reduces cognitive bias and proposes a more effective approach. Reveals that a key element of current training provided to the UK and US intelligence communities and likely all 5 EYES and several European agencies does not

have a proven ability to mitigate cognitive biases Demonstrates that judging the credibility of information from human sources means that intelligence analysis faces greater complexity and cognitive strain than non intelligence analysis Explains the underlying causes cognitive biases based on meta analyses of existing research Shows that identifying the ideal conditions for intelligence analysis is a more effective way of reducing the risk of cognitive bias than the use of ACH Recent high profile intelligence failures from 9 11 to the 2003 Iraq war prove that cognitive bias in intelligence analysis can have catastrophic consequences This book critiques the reliance of Western intelligence agencies on the use of a method for intelligence analysis developed by the CIA in the 1990s the Analysis of Competing Hypotheses ACH The author puts ACH to the test in an experimental setting against two key cognitive biases with unique empirical research facilitated by UK s Professional Heads of Intelligence Analysis unit at the Cabinet Office and finds that the theoretical basis of the ACH method is significantly flawed Combining the insight of a practitioner with over 11 years of experience in intelligence with both philosophical theory and experimental research the author proposes an alternative approach to mitigating cognitive bias that focuses on creating the optimum environment for analysis challenging current leading theories *The Oxford Handbook of National Security Intelligence* Loch K.
