Architecture From the Outside In Robert Gutman, 2012-04-17 Architecture and sociology have been fickle friends over the past half century in the 1960s architects relied on sociological data for design solutions and sociologists were courted by the most prestigious design schools to lecture and teach Twenty years later at the height of postmodernism it was passe to be concerned with the sociological aspects of architecture Currently the rising importance of sustainability in building not to mention an economical crisis brought on in part by a real estate bubble have forced architects to consider themselves in a less autonomous way perhaps bringing the profession full circle back to a close relationship with sociology Through all these rises and dips Robert Gutman was a strong and steady voice for both architecture and sociology Gutman a sociologist by training infiltrated architecture's ranks in the mid 1960s and never looked back A teacher for over four decades at Princeton's School of Architecture Gutman wrote about architecture and taught generations of future architects all while maintaining an outsider status that allowed him to see the architectural profession in an insightful unique way *This Thing Called Theory* Teresa Stoppani, Giorgio Ponzio, George Themistokleous, 2016-11-10 In the age of post digital architecture and digital materiality *This Thing Called Theory* explores current practices of architectural theory their critical and productive role The book is organized in sections which explore theory as an open issue in architecture as it relates to and borrows from other disciplines thus opening up architecture itself and showing how architecture is inextricably connected to other social and theoretical practices The sections move gradually from the specifics of architectural thought its history theory and criticism and their ongoing relation with philosophy to the critical positions formulated through architecture's specific forms of expression and onto more recent forms of architecture's engagement and self definition The book's thematic sessions are concluded by and interspersed with a series of shorter critical position texts which together propose a new vision of the contemporary role of theory in architecture What emerges overall is a critical and productive role for theory in architecture
