**Knowledge and Culture in the Early Dutch Republic** Klaas Berkel,Albert Clement,Arjan Dixhoorn,2025-10-01 The Dutch Republic around 1600 was a laboratory of the Scientific Revolution of the seventeenth century Here conditions were favourable for the development of new ways of knowing nature and the natural philosopher Isaac Beeckman who was born in Middelburg in 1588 was a seminal figure in this context He laid the groundwork for the strictly mechanical philosophy that is at the heart of the new science Descartes and others could build on what they learned directly or indirectly from Beeckman As previous studies have mainly dealt with the scientific content of Beeckman s thinking this volume also explores the wider social scientific and cultural context of his work Beeckman was both a craftsman and a scholar and fruitfully combined artisanal ways of knowing with international scholarly traditions Beeckman s extensive private notebook offers a unique perspective on the cultures of knowledge that emerged in this crucial period in intellectual history De lotgevallen van Klaasje Zevenster Jacob Lennep,1886

**Trying-out** Joost C. A. Schokkenbroek,2008 Until the present day whaling and sealing in the nineteenth century have hardly received attention in Dutch maritime historiography During the two preceding centuries whaling had developed into a prominent maritime industry Various major external and internal problems however contributed to its rapid decline during the second half of the eighteenth century After the Napoleonic Era 1795 1815 increasing numbers of Dutch entrepreneurs resumed whaling both in the Arctic and in the South Seas This book based on extensive research into unexplored archival sources and secondary literature fills many of the gaps in our understanding of how whaling and sealing were organised in the Netherlands
