Kleren Voor De Elite:

Kleding in Nederland, 1813-1920 K. P. C. de Leeuw, 1992 Historisch sociologisch onderzoek naar het kleedgedrag in Nederland tussen 1813 en 1920

The State and the Tributary Mode of Production John F. Haldon, 1993 In this groundbreaking critique of both traditional and Marxist notions of feudalism and of the pre capitalist state John Haldon considers the configuration of state and social relations in medieval Europe and Mughal India as well as in Byzantium and the Ottoman Empire He argues that a Marxist reading of the pre capitalist state can take account of the autonomy of power relations and avoid economic reductionism while still focusing on the forms of tribute which sustained the ruling power Haldon explores the conflicts to which these gave rise and shows the Ottoman state elite often held to be a clear example of independence from underlying social relations to be deeply enmeshed in economic relationships and the extraction of tribute Haldon argues that feudalism was the specifically European form of a much more widely diffused tributary mode whose characteristic social relations and structural constraints can be seen at work in the Byzantine Ottoman and Mughal empires as well While acknowledging the range of ideological and cultural variation within and between these examples of the tributary mode Haldon denies the thesis that such superstructural variations themselves yielded fundamentally contrasting social relations

The Totalitarian Experiment in Twentieth Century Europe David Roberts,2006-04-27 By developing a long term supranational perspective this ambitious multi faceted work provides a new understanding of totalitarianism the troubling common element linking Soviet communism Italian fascism and German Nazism The book s original analysis of antecedent ideas on the subject sheds light on the common origins and practices of the regimes Through this fresh appreciation of their initial frame of mind Roberts demonstrates how the three political experiments yielded unprecedented collective mobilization but also a characteristic combination of radicalization myth making and failure Providing deep historical analysis the book proves that totalitarianism best characterizes the common features in the originating aspirations the mode of action and even the outcomes of Soviet communism Italian fascism and German Nazism By enhancing our knowledge of what totalitarianism was and where it came from Roberts affords important lessons about the ongoing challenges possibilities and dangers of the modern political experiment
