Evaluating Counterterrorism Performance Beatrice de Graaf, 2011-03-15 This book offers a new model for measuring the success and impact of counterterrorism strategies using four comparative historical case studies The effectiveness of counterterrorism measures is hard to assess especially since the social impact of terrorist attacks is a fundamental and complex issue This book focuses on the impact of counterterrorist measures by introducing the concept of the performative power of counterterrorism the extent to which governments mobilize public and political support thereby sometimes even unwittingly assisting terrorists in creating social drama The concept is applied to counterterrorism in the Netherlands Italy the Federal Republic of Germany and the United States in the 1970s Based on in depth case study research using new primary sources and interviews with counterterrorist officials and radicals a correlation is established between a low level of performative power and a decline of terrorist incidents This is explored in terms of the link between social drama as enhanced by counterterrorist measures and ongoing radicalization processes This book demonstrates that an increase in visible and intrusive counterterrorist measures does not automatically

lead to a more effective form of counterterrorism In the open democracies of the west not transforming counterterrorism into a performance of power and repression is at least as important as counterterrorism measures themselves This book will be of much interest to students of terrorism and counter terrorism discourse analysis media and communication studies conflict studies and IR Security Studies in general Books in Print ,1977 **Encyclopedia of Information Systems and Services** ,1989
