Elderhood Louise Aronson, 2019-06-11 Finalist for the Pulitzer Prize in General Nonfiction A New York Times Bestseller Longlisted for the Andrew Carnegie Medal for Excellence in Nonfiction Winner of the WSU AOS Bonner Book Award Winner of the 2022 At Home With Growing Older Impact Award As revelatory as Atul Gawande's Being Mortal physician and award winning author Louise Aronson's Elderhood is an essential empathetic look at a vital but often disparaged stage of life. For more than 5 000 years old has been defined as beginning between the ages of 60 and 70. That means most people alive today will spend more years in elderhood than in childhood and many will be elders for 40 years or more. Yet at the very moment that humans are living longer than ever before we've made old age into a disease a condition to be dreaded denigrated neglected and denied. Reminiscent of Oliver Sacks noted Harvard trained geriatrician Louise Aronson uses stories from her quarter century of caring for patients and draws from history science literature popular culture and her own life to weave a vision of old age that's neither nightmare nor utopian fantasy a vision full of joy wonder frustration outrage and hope about aging medicine and humanity itself. Elderhood is for anyone who is in the author's own words an aging i.e. still breathing human being.

Integrated Care for Complex Patients Steven A. Frankel, James A. Bourgeois, 2018-03-21 This book presents case based descriptions of models for the inclusive multispecialty and multidisciplinary clinical care of complex cases. Cases range from primary care patients with complex systemic medical and psychiatric comorbidity to those requiring specialty care to those with potentially terminal illnesses. While each category and case has its unique requirements often necessitating different models of care the commonalities in approaching complex clinical situations is underscored. Extended case narratives written by the treating physicians summarizing both the course of clinical care and physicians' reflections on the challenges of managing complex patients comprise the bulk of the book. Five additional chapters on systems issues associated with care of complex patients together with a chapter on end of life considerations a narrative analysis of the physicians' reflections about complex patients and a concluding chapter are prominently included to anchor the case narratives. Written by experts in the field these descriptions form unique models for assessing and treating complex cases. Integrated Care for Complex Patients is a useful guide for all health practitioners and health administrators who are responsible for clinically complex cases including physicians in primary care and psychiatry physician assistants and nurse practitioners and psychologists.
