Embedded Racism Debito Arudou,2021-11-26 Despite domestic constitutional provisions and international treaty promises Japan has no law against racial discrimination Consequently businesses around Japan display Japanese Only signs denying entry to all foreigners on sight Employers and landlords routinely refuse jobs and apartments to foreign applicants Japanese police racially profile foreign looking bystanders for invasive questioning on the street Legislators administrators and pundits portray foreigners as a national security threat and call for their segregation and expulsion Nevertheless Japan s government and media claim there is no discrimination by race in Japan therefore no laws are necessary How does Japan resolve the cognitive dissonance of racial discrimination being unconstitutional yet not illegal Embedded Racism untangles Japan s complex narrative on race Starting with case studies of hundreds of Japanese Only exclusionary businesses it carefully analyzes the social construction of Japanese identity through laws public policy jurisprudence and media messages It reveals how the concept of a Japanese has been racialized to the point where one must look Japanese to have equal civil and human rights in Japan Completely revised and updated for this Second Edition including landmark events like the 2020 Tokyo Olympics the Covid Pandemic and the Carlos Ghosn Case Embedded Racism is the product of three decades of research and fieldwork by a scholar living in Japan as a naturalized Japanese citizen It offers a perspective into how Japan s entrenched misunderstood and deliberately overlooked racial discrimination not only undermines Japan s economic future but also emboldens white supremacists worldwide who see Japan as their template ethnostate

Parenting Matters National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Committee on Supporting the Parents of Young Children,2016-11-21 Decades of research have demonstrated that the parent child dyad and the environment of the family which includes all primary caregivers are at the foundation of children s well being and healthy development From birth children are learning and rely on parents and the

other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives, generate stress or calm, and create any number of emotions including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8, universal preventive and targeted strategies used in a variety of settings that have been effective with parents of young children, and that support the identified knowledge, attitudes, and practices, and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes, as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy research and practice in the United States.

Tax, Inequality, and Human Rights Philip Alston, Nikki Reisch, 2019-04-11. This book examines why taxation is central to the enjoyment or suppression of human rights in an age of rising nationalism, authoritarianism, and disillusionment with the traditional role of the state. Taxation and human rights are at the heart of debates about the appropriate balance in society between the public and private sectors and ultimately the content of a new social contract.
