Accountants,1928 **Classical Dynamics of Linear and Nonlinear Systems** Gyaneshwar P. Srivastava,2025-12-15

Classical Dynamics of Linear and Nonlinear Systems offers a comprehensive exploration of dynamical systems from fundamental principles to advanced applications This textbook presents a unified treatment of classical dynamics bridging the gap between linear and nonlinear systems while providing both theoretical foundations and practical applications

Beginning with a thoughtful classification of dynamical systems the book systematically builds understanding from particle mechanics to quantum field theory Following a rigorous analysis of particle dynamics in both configuration and phase spaces Newtonian Lagrangian Hamiltonian and Hamilton Jacobi formulations the book provides a detailed examination of molecular and crystalline structures across multiple dimensions Later chapters conduct an in depth exploration of nonlinear phenomena and chaos theory with real world applications and elegant formulations of classical field theories using Lagrangian and Hamiltonian approaches The final sections of the book provide an accessible introduction to quantum field theory and its relationship to classical systems in addition to powerful perturbation techniques applicable to both classical and quantum problems This book transforms abstract theoretical concepts into practical understanding through rigorous mathematical and numerical frameworks and illuminating examples making it ideally suited for advanced undergraduate and postgraduate students enrolled in physics applied mathematics engineering and materials science courses

Key Features
Connects traditional mechanical concepts with modern physics
Includes several worked examples in addition to end of chapter problems and further reading to support teaching and learning
