Further social scientists particularly those working in the fields of sociology and psychology have provided a convergence of findings attesting to the magnitude of one of today's most significant social problems domestic violence e.g. spouse child and elder abuse. Such efforts have served as the impetus for heightened clinical and investigative activity in the area of violent behavior. Indeed a wide range of mental health experts such as psychologists psychiatrists social workers counselors and rehabilitation specialists have endeavored to focus on strategies and issues in research and treatment for violent individuals and their victims. The purpose of this book is to provide a comprehensive and timely examination of current psychological approaches with violent criminal offenders. Despite the fact that we continue to have much to learn about perpetrators of violent acts in recent an increasingly large body of empirical data have been adduced about this year's issue. However these data generally have appeared in disparate journals and books. That being the case it is our belief that such a handbook now is warranted.
