The Palgrave Handbook of Social Theory in Health, Illness and Medicine F. Collyer, 2015-02-12 This wide reaching handbook offers a new perspective on the sociology of health illness and medicine by stressing the importance of social theory Examining a range of classic and contemporary female and male theorists from

across the globe it explores various issues including chronic illness counselling and the rising problems of obesity

Handbook of the Sociology of Medical Education Caragh Brosnan, Bryan S. Turner, 2009-09-10 The Handbook of the Sociology of Medical Education provides a contemporary introduction to this classic area of sociology by examining the social origin and implications of the epistemological, organizational and demographic challenges facing medical education in the twenty first century. Beginning with reflections on the historical and theoretical foundations of the sociology of medical education, the collection then focuses on current issues affecting medical students, the profession and the faculty, before exploring medical education in different national contexts. Leading sociologists analyze the intersection of medical education and social structures such as gender, ethnicity and disability, the effect of changes in medical practice such as the emergence of evidence based medicine on medical education, and the ongoing debates surrounding the form and content of medical curricula. By examining applied problems within a framework which draws from social theorists such as Pierre Bourdieu, this new collection suggests future directions for the sociological study of medical education and for medical education itself.

Research Handbook on Society and Mental Health Marta Elliott, 2022-12-13 This engaging Research Handbook offers a comprehensive overview of research on social factors and mental health, examining how important it is to consider the social context in which mental health issues arise and are dealt with in the mental health care system. It illustrates how social factors affect the interactive process of psychiatric diagnosis and how society responds to people who are labelled as mentally ill.

The Palgrave Handbook of Gender and Healthcare E. Kuhlmann, E. Annandale, 2012-06-26 An authoritative state of the art collection that brings together key experts to provide an overview of the field. This new paperback edition includes 3 new chapters on human resources and health, end of life care and complementary and alternative medicine, as well as thorough updates to the introduction and conclusion.

To Fix Or To Heal Joseph E. Davis, Ana Marta Gonzalez, 2016-02-26 Do doctors fix patients? Or do they heal them? For all of modern medicine's many successes, discontent with the quality of patient care has combined with a host of new developments from aging populations to the resurgence of infectious diseases which challenge medicine's overreliance on narrowly mechanistic and technical methods of explanation and intervention or 'fixing' patients. The need for a better balance for more humane healing rationales and practices that attend to the social and environmental aspects of health and illness and the experiencing person is more urgent than ever. Yet in public health and bioethics, the fields best positioned to offer countervailing values and orientations, the dominant approaches largely extend and reinforce the reductionism and individualism of biomedicine. The collected essays in *To Fix or To Heal* do more than document the persistence of reductionist approaches and the attendant extension of medicalization to more and more aspects of our lives. The contributors also shed valuable light on why reductionism has persisted and why more holistic models incorporating social and environmental factors have gained so little traction. The contributors examine the moral appeal of reductionism, the larger rationalist dream of technological mastery, the growing

valuation of health and the enshrining of individual responsibility as the seemingly non coercive means of intervention and control This paradigm challenging volume advances new lines of criticism of our dominant medical regime even while proposing ways of bringing medical practice bioethics and public health more closely into line with their original goals Precisely because of the centrality of the biomedical approach to our society the contributors argue challenging the reductionist model and its ever widening effects is perhaps the best way to press for a much needed renewal of our ethical and political discourse

The Public Shaping of Medical Research Peter Wehling, Willy Viehöver, Sophia Koenen, 2014-11-27 Patient organizations and social health movements offer one of the most important and illuminating examples of civil society engagement and participation in scientific research and research politics Influencing the research agenda and initiating funding and accelerating the development of diagnostic tools effective therapies and appropriate health care for their area of interest they may champion alternative sometimes controversial programs or critique dominant medical paradigms Some movements and organizations advocate for medical recognition of contested illnesses as with fibromyalgia or ADHD while some attempt to de medicalize others such as obesity or autism Bringing together an international selection of leading scholars and representatives from patients organizations this comprehensive collection explores the interaction between civil society groups and biomedical science technology development and research politics It takes stock of the key findings of the research conducted in the field over the past two decades and addresses emerging problems and future challenges concerning the interrelations between health movements and patient organisations on the one hand and biomedical research and research policies on the other hand Combining empirical case studies with conceptual discussion the book discusses how public participation can contribute to as well as restrict the democratization of scientific knowledge production This volume is an important reference for academics and researchers with an interest in the sociology of health and illness science and technology studies the sociology of knowledge medical ethics or healthcare management and research as well as medical researchers and those involved with health related civil society organizations

Culture, Bodies and the Sociology of Health Elizabeth Ettorre, 2016-05-13 Culture Bodies and the Sociology of Health explores the boundaries between bodies and society with special reference to uncovering the cultural components of health and the ways in which bodies are categorized according to a form of culturally embedded health orthodoxy Illustrating the importance of contextualizing the body as a cultural entity this book demonstrates that the spaces and boundaries between healthy bodies are becoming more diverse than ever before The volumes international team of scholars engage with a range of issues surrounding the cultural construction of the body as a site of health and illness As such it will be of interest not only to sociologists especially sociologists of health but also to scholars of media and communication studies as well as cultural theorists

Research Handbook on the EU's Common Foreign and Security Policy Steven Blockmans, Panos Koutrakos, In times of rapid change and unpredictability the European Union's role in the world is sorely tested How successfully the EU meets challenges such as war terrorism and climate change and how effectively the Union taps into opportunities like mobility and technological progress depends to a great extent on the ability of the EU's institutions and member states to adopt and implement a comprehensive and integrated approach to external action This Research Handbook examines the law policy and practice of the EU's Common Foreign and Security Policy including the Common Security and Defence and gauges its interactions with the other external policies of the Union including trade development energy as well as the evolving political and economic challenges that face the European Union

The Sociology of Health and Illness Peter Conrad, 2005 This collection of 49 readings offers an integrated analysis of the most important issues regarding health and health care from a critical and sociological perspective Substantive introductions provide context for the readings With ten new and two revised essays the Seventh Edition contains more coverage of key areas such as alternative medicine the pharmaceutical industry and the relationship between healthcare and politics

Encore Adulthood Phyllis Moen, 2016-04-06 The Baby Boomer generation is facing a time of heightened uncertainty Blessed with unprecedented levels of education health and life expectancy many hope to contribute to society after their retirement Yet they must also navigate ambiguous career exits and retirement paths as established scripts for schooling parenting and careers continue to unravel In Encore Adulthood Phyllis Moen presents the realities of the encore life stage the years between traditional careers and childraising and old age Drawing on large scale data sets and interviews with Boomers HR personnel and policymakers this book illuminates the challenges that Boomers

encounter as they transition from traditional careers into retirement Beyond data analysis Moen discusses the personal impact for Boomers wellbeing happiness and health when they are unable to engage in meaningful work during their encore years as well as the potential economic loss that would occur when a large qualified group of people prematurely exit the workforce Moen concludes with proposals for a range of encore jobs that could galvanize Boomers to take on desirable and sought after second acts emphasizing meaningful work over high paying jobs and flexibility over long hours An important analysis of an understudied and new life stage Encore Adulthood makes an important contribution to the existing scholarship on careers work and retirement Collaboration across Health Research and Medical Care Bart Penders,Niki

Vermeulen,John Parker,2016-03-03 Health research and health care practice are radically transforming as governments invest more in large scale national and international health projects with increasing levels of interdisciplinarity as populations age and as nations grow wealthier This volume examines the structures and dynamics of scientific collaboration in health research and health care Bringing together detailed research from the US Canada Europe and Japan Collaboration Across Health Research and Medical Care sheds light on the features environments and relationships that characterise collaboration in health care and research exploring changing patterns of collaboration and examining the causes and consequences of team work in the health domain With attention to the increasingly porous boundaries between health care and research the book not only investigates research settings but also considers the manner in which knowledge produced in laboratories and clinics is translated into day to day medical and care practice and health initiatives It offers a rich examination of the political technical and organisational facets of collaboration and the implications of changes in collaboration for every day treatment and practice Collaboration Across Health Research and Medical Care will be of interest to scholars of sociology and science and technology studies as well as those working in the field of health policy and research

Situated Intervention Teun Zuiderent-Jerak,2015-08-28 An exploration of sociological research that is neither detached nor engaged a new approach to sociological knowledge production with examples from health care In this book Teun Zuiderent Jerak considers how the direct involvement of social scientists in the practices they study can lead to the production of sociological knowledge Neither detached sociological scholarship nor engaged social science this new approach to sociological research brings together two activities often viewed as belonging to different realms intervening in practices and furthering scholarly understanding of them Just as the natural sciences benefited from broadening their scholarship from theorizing to experiment so too could the social sciences Additionally Zuiderent Jerak points out rather than proceeding from a pre set normative agenda scholarly intervention allows for the experimental production of normativity Scholars are far from detached but still may be surprised by the normative outcomes of the interactions within the experiment Zuiderent Jerak illustrates situated intervention research with a series of examples drawn from health care Among the topics addressed are patient compliance in hemophilia home care the organization of oncology care and the value

of situated standardization the relationship between standardization and patient centeredness the development of patient centered pathways value driven and savings driven approaches to the construction of health care markets and multiple ontologies of safety in care for older adults Finally returning to the question of normativity in sociological research Zuiderent Jerak proposes an ethics of specificity according to which research adapts its sociological responses to the practices studied Sociology not only has more to offer to the practices it studies it also has more to learn from them *Ci curano o ci curiamo?
