web 1 which of the following statements are true about work include all that apply work is a form of energy a watt is the standard metric unit of work units of work would be equivalent to a newton times a meter a kg m 2 s 2 would be a unit of work work is a time based quantity it is dependent upon how fast a force displaces an object

potential energy the physics classroom - Apr 03 2023

web power an object can store energy as the result of its position for example the heavy ball of a demolition machine is storing energy when it is held at an elevated position this stored energy of position is referred to as potential energy similarly a drawn bow is able to store energy as the result of its position

work and energy review with answers 2 physics classroom - Oct 29 2022

web answer a for any given situation the work done by a force can be calculated using the equation wfd cost heta where f is the force doing the work d is the displacement of the object and theta is the angle between the force and the displacement energy conservation teacher notes the physics classroom - May 24 2022

web notes the energy analysis 1 concept builder is an adjustable size file that displays nicely on smart phones on tablets such as the ipad on chromebooks and on laptops and desktops the size of the concept builder can be scaled to fit the device that it is displayed on the compatibility with smart phones ipads other tablets and
