**Knock Knock Pack This! Pad** Knock Knock,2005      **Deep Down in the Jungle...** Roger D. Abrahams,2018-04-20

With the growth of interest in folklore it becomes increasingly evident that the presentation of a collection needs some rationale more than the fact that traditional materials have been collected and properly annotated Much has been gathered and is now accessible through journals archives and lists If a corpus of lore is not presented in some way which bears new light on the process of word of mouth transmission on traditional forms or expressions or on the group among whom the lore was encountered there is little reason to present it to the public This work represents an attempt to present a body of folklore collected among one small group of Black Americans in a neighborhood in South Philadelphia The author s approach toward collection and presentation has been intensive He has tried to collect in depth and to recreate in his presentation the social background in which the lore was found and to relate the lore with the life and the values of the group Abraham s work is a departure from any past methods of analyzing folklore and therefore a description of the author s point of view and his method will be given first The majority of this work was written before his methodology was actually formulated However throughout the project the object was to illuminate as fully as possible the lore of one small group of African Americans from urban Philadelphia The methodology which developed did so because of this objective more than anything else Though the formulation of this theory may seem ex post facto it is included because it clarified much during the rewritings of this book and more importantly because it will clarify many matters for the lay reader and for the professional folklorist ,

**Multifactorial Analysis in Corpus Linguistics** Stefan Thomas Gries, 2005-04-29 This book presents a novel analysis of the word order alternation of English transitive

phrasal verbs Particle Movement from a cognitive functional and psycholinguistic perspective Its main objective however is a methodological one namely to demonstrate the superiority of corpus based multifactorial and probabilistic approaches to grammatical phenomena over traditional analyses based on acceptability judgements and minimal pair tests The advantages resulting from the advocated multifactorial approach to Particle Movement are Particle Movement can be described at a previously unknown level of detail all determinants ever proposed to govern the alternation can be integrated into a single hypothesis explaining the alternation constructions can be compared to each other with respect to their degree of prototypicality and similarity it is possible to actually predict with a high degree of accuracy which of the two word orders native speakers will subconsciously choose in the natural production of speech and text thereby passing the most rigorous test conceivable finally competing hypotheses can be compared in terms of their predictive power Apart from these methodological points the study also addresses the more theoretical and linguistic question of how to explain such results It is argued that theories of language production that rest on the notion of processing effort are contrary to some contemporary analysts not ideally suited to explain such phenomena and that interactive activation models of language production allow for a more elegant interpretation and implementation of the results
