**Amendment 6 to the Fishery Management Plan for the Shrimp Fishery of the South Atlantic Region**, 2005 **State and Community in Fisheries Management** E. Paul Durrenberger, Thomas King, 2000-05-30 Those who are involved with fishing and fisheries resource management including fishermen their communities production processing distribution and marketing industries and various government and non governmental organizations confront the contradictions arising from the appropriation allocation and distribution of fisheries and marine resources in a variety of ways The authors call into question the assumptions of policy prescriptions to common resource problems by examining the experiences of people and societies confronted with and adapting to these resource appropriation allocation and distribution problems They suggest that tragedies of resource depletion and institutional failure to deal with them are not characteristic of human nature but rather are by products of particular cultural practices institutions and assumptions The detailed empirical ethnographic study of these relationships holds great potential for informing those who are making future policy decisions as well as contributing to the theories of human behavior and cooperation to solve such problems

*Mississippi after Katrina* Jennifer Trivedi, 2020-11-24 Hurricane Katrina made landfall on the American Gulf Coast on August 29 2005 Biloxi Mississippi a small town on the coast was one of the towns devastated directly by the storm Drawing on ethnographic media and historic document research and analysis Jennifer Trivedi explores the pre disaster cultural historical social political and economic distinctions that shaped the recovery of Biloxi and Biloxians Trivedi examines how networks of people groups and institutions worked to prepare for and recover from the hurricane reinforcing the distinctions that existed before the storm

Cooperation in Economy and Society Robert C. Marshall, 2010-11-16 The essays in the book analyze cases of cooperation in a wide range of ethnographic archaeological and evolutionary settings Cooperation is examined in situations of market exchange local and long distance reciprocity hierarchical relations common property and commons access and cooperatives Not all of these analyses show stable and long term results of successful cooperation The increasing cooperation that is so highly characteristic of our species over the long term obviously has replaced neither competition in the short term nor hierarchical structures that reduce competition in the mid term Interactions based on strategies of cooperation competition and hierarchy are all found simultaneously in human social relations

Gorman, 2010 A proposal for a new framework for fostering collaborations across disciplines addressing both theory and practical applications Cross disciplinary collaboration increasingly characterizes today's science and engineering research The problems and opportunities facing society do not come neatly sorted by discipline Difficulties arise when researchers from disciplines as different as engineering and the humanities work together and find that they speak largely different languages This book explores a new framework for fostering collaborations among existing disciplines and expertise communities The framework unites two ideas to emerge from recent work in STS trading zones in which scientific subcultures each with its own language develop the equivalents of pidgin and creole and interactional expertise in which experts learn to use the language of another research community in ways that are indistinguishable from expert practitioners of that community A trading zone can gradually become a new area of expertise facilitated by interactional expertise and involving negotiations over boundary objects objects represented in different ways by different participants The volume describes applications of the framework to service science business strategy environmental management education and practical ethics One detailed case study focuses on attempts to create trading zones that would help prevent marine bycatch another investigates trading zones formed to market the female condom to women in Africa another describes how humanists embedded in a nanotechnology laboratory gained interactional expertise resulting in improved research results for both humanists and nanoscientists Contributors Brad Allenby Donna T Chen Harry Collins Robert Evans Erik Fisher Peter Galison Michael E Gorman Lynn Isabella Lekelia D Jenkins Mary Ann Leeper Roop L Mahajan Matthew M Mehalik Ann E Mills Bolko von Oetinger Elizabeth Powell Mary V Rorty Jeff Shrager Jim Spohrer Patricia H Werhane      A Handbook of Economic Anthropology, Second Edition James G. Delaney, 2024-04-30 This book explores in rich ethnographic detail the lives of a group of Japanese fishers and community residents in coastal Japan in the aftermath of the tsunami generated from the 2011 Great East Japan Earthquake Focused on one town in Miyagi Prefecture near the epicenter of the 2011 quake the text provides a singularly unique opportunity to hear in their own voices individuals reflections and experiences on life after the disasters while also drawing upon anthropological fieldwork data from many of the same individuals 10 years prior to the disaster Alyne E Delaney skillfully contextualizes local culture and fishing livelihoods and lays out key impacts of disaster reconstruction policies on local society illustrating the importance of people s attachment to their places and seascapes their connections with one another and shared traditions and their sea connected working ways of life Delaney reveals not only the heartbreak of the disasters and the strain placed on individuals and coastal communities when national policymakers fail to use good governance when rebuilding but also provides insights into how some have managed to recover and learn the wisdom of knowing what real happiness is offering readers an enlightening discourse of the potency of the local cultural traits of autonomy and adaptability *Uncertain Times* E. Paul Durrenberger, 2017-08-15 In this first ever collection of labor anthropology from around the world the contributors to *Uncertain Times* assert that traditional labor unions have been co-opted by neoliberal policies of corporate capital and have become service organizations rather than drivers of social movements The current structure of labor unions facilitates corporations need for a stable labor force while reducing their power to prevent outsourcing subcontracting and other methods of undercutting worker security and union power Through case studies from Switzerland Israel Argentina Mexico the United States Greece Sweden Turkey Brazil and Spain the authors demonstrate that this process of neutering unions has been uneven across time and space They also show that the potential exists for renewed union power based on more vociferous and creative collective action These firsthand accounts from activist anthropologists in the trenches as union members and staff as well as academics analyzing policy law worker organizing and community impact illustrate the many approaches that workers around the world are taking to reclaim their rights in this ever shifting labor landscape *Uncertain Times* is the first book to use this crucial comparative ethnographic

approach for understanding the new rules of the global labor struggle and the power workers have to change those rules The volume will be of great interest to students and scholars of anthropology sociology of work and labor studies labor union leadership and others interested in developing innovative methods for organizing working people fomenting class consciousness and expanding social movements Contributors Alpan Birelma Emma Braden Maria Eugenia de la O Christopher Kelley Staffan L fving Gadi Nissim Darcy Pan Steven Payne Alicia Reigada Julia Soul Manos Spyridakis Christian Zlalniski

**Rural America** Caroline S. Kelsohn,2002 Thomas Jefferson once envisioned the United States as a nation of yeomen farmers Looking around today however illustrates that nothing could be further from the truth In a globalised world and techno centred society urban sprawl is overtaking rural America For over a century farming was the backbone of the American economy and though it is still critical to American productivity many rural areas are plagued by poverty and job reduction Agricultural issues have a hold over national politics as in the debates over farm subsidies but they cannot change several significant trends in America today the movement toward fewer and larger farms environmental pressures from urban and suburban interests and changing food consumption patterns In order to assist the remaining yeomen farmers a comprehensive and integrated agricultural policy must be initiated to sustain the nation s farming communities This book analyses the status of the farm industry in rural America providing a historical context for agriculture and assessing its future for the nation and the information provided in this book is necessary to understanding the nature of what has historically been a key component of American industry and life Atlantic Herring (Clupea Harengus Harengus) Fishery Management Plan (FWP) ,1999 **Fish for Life** J. Paul Durrenberger,Suzan Erem,2015-12-03 American labor leaders are constantly developing new programs to revive the union movement What happens when these plans collide with the daily lives of front line union staff and members This book examines the often conflicting interests of key players in the trenches of a national effort to bring back the American labor movement Brutally honest funny never dull this anthropological ethnography shows the daily struggles of union members today to bring about positive change and hold together their urban labor union in an era of
