comprehensive approach to the air vehicle design process using the principles of systems engineering Due to the high cost
and the risks associated with development complex aircraft systems have become a prime candidate for the adoption of
systems engineering methodologies This book presents the entire process of aircraft design based on a systems engineering
approach from conceptual design phase through to preliminary design phase and to detail design phase Presenting in one
volume the methodologies behind aircraft design this book covers the components and the issues affected by design
procedures The basic topics that are essential to the process such as aerodynamics flight stability and control aero structure
and aircraft performance are reviewed in various chapters where required Based on these fundamentals and design
requirements the author explains the design process in a holistic manner to emphasise the integration of the individual
components into the overall design Throughout the book the various design options are considered and weighed against each
other to give readers a practical understanding of the process overall Readers with knowledge of the fundamental concepts
of aerodynamics propulsion aero structure and flight dynamics will find this book ideal to progress towards the next stage in
their understanding of the topic Furthermore the broad variety of design techniques covered ensures that readers have the
